

HAL LEONARD BASS METHOD

COMPLETE EDITION

Contains books 1, 2, and 3 bound together in one easy-to-use volume

SECOND EDITION
BY ED FRIEDLAND

HAL LEONARD BASS METHOD

COMPLETE EDITION

Contains books 1, 2, and 3 bound together in one easy-to-use volume

BY ED FRIEDLAND

Each track on the accompanying CDs is recorded in stereo, with bass panned hard right.

To remove the bass, adjust the balance control on your CD player.

All instruments performed by Ed Friedland.
Edited by Doug Downing

ISBN 0-7935-6383-6

THE ELECTRIC BASS

THE BASS AMP

To hear yourself clearly, it is necessary to play an electric bass through an amplifier. Though there are many different sizes, a simple, self-contained unit ("combo") will work fine. Use a patch cord, or cable, to connect from the output of the bass to the input of the amp. Make sure the amp's volume knob is turned off, or all the way counterclockwise. The tone controls should be set "flat," or at 12 o'clock. Turn on the power, and slowly adjust the volume to an appropriate level. Be careful; too much volume could blow out the speaker!

TUNING

TUNING TO THE CD

TRACK 1

To tune your bass, adjust the tuning pegs. Tightening a peg will raise the pitch of a string, loosening a peg will lower it.

On CD Track 1, each string is played four times. The first string you'll hear is the G (1st) string. Check your string with the CD; if it sounds lower than the recording, tighten the tuning peg until you get closer to the pitch on the CD. If your string is higher, then loosen the peg. Once the G string is in tune, repeat this process with the D, A, and E strings (2, 3, and 4).

USING AN ELECTRONIC TUNER

Electronic tuners have become very affordable, so it's a good idea to have one. There are generally two types available: a "bass" (or "guitar") tuner, which will only read the open strings of your instrument, or a "chromatic" tuner, which will read any pitch. Either will do the job. Plug your bass into the input of the tuner and play your open G string. The tuner will read the pitch and tell you if the string is sharp (too high) or flat (too low). Adjust the tuning peg until the tuner indicates you are in tune. Repeat the process with the D, A, and E strings.

TUNING TO A KEYBOARD

Use the appropriate key on a piano/keyboard to check your open strings.

RELATIVE TUNING

Here's another way to tune your bass. It is less accurate, as it assumes that your starting string is in tune—and it is harder for the ear to hear the low pitch of the bass as well as a tuner can—but this method works when there are no other alternatives. It's also a good way to check your tuning.

- Start with your open G string. If there is an accurate G available, use it; otherwise, assume the G string is tuned to the correct pitch.
- Play the D string at the 5th fret, and see if that note matches the open G. Tune the D string up or down until the two notes match.
- Play the A string at the 5th fret; compare it to the open D. Tune the A string up or down until the two notes match.
- Play the E string at the 5th fret; compare it to the open A. Tune the E string up or down until the two notes match.

This is called *relative tuning* because the strings are tuned relative to one another.

PLAYING POSITIONS

STANDING

- Buy a comfortable strap between 2½ and 3 inches wide. Leather or woven cotton are good choices. A padded, stretchy neoprene strap will help absorb the weight of the instrument.
- Adjust the strap so that both hands can be comfortable on the bass. With your left arm at your side, bend the elbow, bringing your forearm up. This is your optimal position for the left hand.
- Hold your right arm straight out in front of you at shoulder height, and let the hand hang down naturally. Bend your elbow, and bring your arm in towards your body. That is the optimal position for your right hand.
- Be sure to avoid any extreme bends in either wrist.

TIP: Run the cable under your strap to avoid pulling it out of the jack while standing.

SITTING

- It's best to use a strap while sitting to keep the instrument at the proper height.
- Without a strap, rest the bass on your right leg. It may help to use a small footstool under your right foot.
- Keep your left arm off your leg.
- Angle the neck slightly away from the body.

MUSICAL SYMBOLS

Music consists of two basic elements: **rhythm** and **pitch**. Pitch is notated using a set of lines (and spaces) called a staff. The higher a note appears on a staff, the higher its pitch; the lower a note appears, the lower its pitch. At the beginning of the staff is a clef sign. Bass music is written in the bass clef or “F clef.”

The two dots in the clef sign surround the line on which the pitch “F” is written; hence the term “F clef.”

The musical alphabet uses the letters **A, B, C, D, E, F**, and **G**. After G, the sequence repeats starting with A. In bass clef, the notes written on the **lines** of the staff are G–B–D–F–A. You can remember this sequence as “Good Boys Do Fine Always.” The notes on the **spaces** are A–C–E–G. “All Cows Eat Grass” may help you remember this.

Rhythm, the other basic element of music, is notated using **measures** (also known as “bars”), which contain a set number of beats (the pulse of the music). Each measure is separated from the next by a **bar line**. A double bar line is used to show the end of a section of music. The final bar line is used to show the end of a piece of music.

The number of beats in each measure is indicated by the **time signature**, which appears at the start of a piece after the clef sign. The time signature looks like a fraction. The top number tells us how many beats there are in a bar, and the bottom number tells us what type of note is to be counted. Most of the examples in this book will be in 4/4 time.

TIME SIGNATURE

In the first part of this book, you will see three different kinds of note values. They are:

NOTE VALUES

RIGHT-HAND TECHNIQUE

FINGERSTYLE

The most common approach for playing electric bass is fingerstyle—i.e., using the index (i) and middle (m) fingers of the right hand to play the strings. The fingers give you a warm, full sound that can be controlled easily by developing touch sensitivity.

- Let your fingers hang comfortably, straight over the strings; don't curl them.
- Start by resting the tip of the thumb gently on the pickup.
- Using the fleshy pad of your finger, place it on top of the string.

E STRING

Gently push down and across the top of the E string, letting your finger come to rest against the pad of the thumb. Alternate strokes between the index and middle fingers. Repeat this until you feel comfortable. Play lightly; too much force will give you a distorted sound.

right-hand position

A STRING

Move your finger to the A string. Push down and across the string, letting your finger come to rest against the E string at the end of the stroke. Alternate fingers; repeat several times.

end of fingerstroke

D STRING

Drop your thumb to the E string. Move your finger to the D string, push down and across, letting your finger come to rest against the A string. Alternate fingers and repeat.

muting the E string

G STRING

Drop your thumb onto the A string, and make it lean against the E string. This mutes both strings to prevent unwanted ringing. Put your finger on the G string. Push down and across the string, letting your finger come to rest against the D string. Alternate fingers and repeat.

muting the E and A strings

TIP: As you alternate fingers, place each finger down for the next stroke just slightly ahead of time, to mute the previous note. This will give you a more controlled bass sound.

PICK STYLE

Pick style produces a clear, distinct sound, and is a very popular technique for playing rock bass. While most bassists tend to use their fingers, pick style is a good skill to have.

The thickness of the pick will affect the tone: A thin pick may be too floppy to produce a strong tone; a heavy pick may not be flexible enough. See what gauge feels right to you.

- Curl your index finger and place the pick on it, letting just the tip stick out.
- Place your thumb over the top of the pick, holding it securely—but not too tightly.
- Make sure the pick is flat against the string; don't use the edge of the pick.
- Rest your pinky against the face of the bass, or on the lower edge of the pickup.

The pick can be used to play **downstrokes** (▣) and **upstrokes** (▤). The downstroke has a strong attack and works well for hard rock. Play the previous examples again, this time with a pick, using downstrokes (▣). Use a light wrist motion with a little bit of forearm movement.

TIP: To get a full sound from each string, make sure the pick connects fully; let the pick “travel through” and come to rest against the next string after the stroke. Be careful, however, not to play too hard (especially on strings D and G); overplaying can make the string “flap out,” producing a weak tone.

NOTE: While you will eventually develop a preference, it's important to play both fingerstyle and pick style to be a well-rounded bassist. Readers are encouraged to learn fingerstyle first—as it presents many unique challenges to the beginning player—and then, at a later time, to try pick style. Any example can be played either fingerstyle or with a pick.

LEFT-HAND TECHNIQUE

Now it's time to start using the left hand. The fingers are numbered 1 through 4 as shown.

1-2-4 FINGERING SYSTEM

The 1-2-4 fingering system allows us to keep the hand relaxed and comfortable, particularly when playing in the lower regions of the bass where the frets are farther apart. Start with the pad of your thumb in the middle of the neck; make sure it doesn't stick up over the top. The thumb is positioned between the first and second fingers.

- Place your first finger directly behind the 1st fret of the E string, pressing down lightly.
- Place your second finger on the 2nd fret.
- Place your fourth finger on the 3rd fret.

1st position

2nd position

3rd position

Notice that we have access to three frets—this is called a **position**. We'll study three playing positions in this book: 1st position (with the index at the 1st fret), 2nd position (with the index at the 2nd fret), and 3rd position (index at the 3rd fret).

TIP: Keep your left hand relaxed when you play. Never forcibly stretch your hand or hold a position that feels strained.

OPEN-STRING EXERCISES

The following exercises are played on the open strings and will help you with basic rhythms, fingerstyle technique, and crossing the strings. Here are the notes for the open strings as written on the staff.

The open E string is written on an added line below the staff, called a **ledger line**.

Each exercise below is played on a single string. Count the rhythms out loud at first, and then play them. As you play, concentrate on alternating between index (i) and middle (m) fingers, as shown.

E STRING

1

i m i m i m i m i m

COUNT: 1 2 3 4 1 - 2 3 - 4 1 2 3 - 4 1 - 2 - 3 - 4

A STRING

2

i m i m i m i m i m

COUNT: 1 - 2 3 4 1 2 3 - 4 1 2 3 4 1 - 2 - 3 - 4

D STRING

3

i m i m i m i m i m

COUNT: 1 2 3 - 4 1 - 2 3 4 1 - 2 - 3 - 4 1 2 3 4

G STRING

4

i m i m i m i m i m

COUNT: 1 - 2 - 3 - 4 1 - 2 3 4 1 2 3 4 1 2 3 - 4

When playing fingerstyle, the most important thing to remember is to alternate fingers. Once you get used to it, this technique allows you to play notes quickly and easily. You may begin your alteration with either finger—index or middle. Try playing the above exercises again, beginning with “m” instead of “i.”

Now let's try playing on more than one string. These exercises move *up* the open strings. Continue to alternate fingers as you move up from one string to the next. Remember to let your fingers "travel through" on each stroke.

5

i m i m i m i m i m i m

COUNT: 1 2 3 4 1 2 3 4 1 2 3 4 1 2 3 4

6

i m i m i m i

COUNT: 1 - 2 3 4 1 - 2 3 - 4 1 - 2 3 4 1 - 2 - 3 - 4

THE RAKE

When moving *down* a string, use the same finger to play both strings—this is called the **rake technique**.

i m rake m i

The idea is to use as little effort as possible to get from one string to the next. The rake actually helps keep your right hand relaxed as you move down to the lower string.

Try these exercises moving down the open strings. (Use your left hand to mute the higher open strings.)

7

i m i i m m i m m

COUNT: 1 - 2 3 4 1 - 2 3 - 4 1 2 3 - 4 1 - 2 - 3 - 4

8

i m i m m i m m i m i m m

COUNT: 1 2 3 4 1 2 3 4 1 - 2 3 4 1 - 2 3 - 4

This example mixes ascending and descending motion through the strings. It starts on "m," but you could also switch and begin with "i." Remember: When crossing to a higher string, alternate fingers; when crossing to a lower string, use the same finger (the "rake technique") on both strings.

9

m i m i m i m i i i m m

COUNT: 1 2 3 4 1 - 2 3 - 4 1 2 3 - 4 1 2 3 - 4

NOTES ON THE E STRING

E

OPEN

F

G

OPEN

E

1st FRET

F

3rd FRET

G

These notes are in **1st position**, with the first finger of the left hand on the 1st fret. Here are a few tips:

- Place your finger directly behind (not on top of) the fret.
- Experiment with different amounts of pressure; it takes less than you think.
- Keep each note ringing until you're ready to play your next note.

10

COUNT: 1 - 2 - 3 - 4 1 - 2 - 3 - 4 1 - 2 - 3 - 4 1 - 2 - 3 - 4 1 - 2 - 3 - 4

11

COUNT: 1 - 2 3 - 4 1 - 2 3 - 4 1 - 2 3 - 4 1 - 2 3 - 4 1 - 2 - 3 - 4

12

COUNT: 1 2 3 4 1 2 3 4 1 2 3 4 1 2 3 4 1 2 3 - 4

Say the names of the notes out loud while you play, like “E... F... G... F... (etc.)”. Remember to alternate i and m fingers in the right hand as you play.

13 

This example skips a space when going from E to G.

14

Practice keeping the count going on your own.

15  4/4

COUNT: 1 - 2 3 - 4

This next example is 8 measures long. When you reach the end of the first line, continue on to the second line without a pause. The count-off for the track is two measures long: “1... 2... 1, 2, 3, 4...”

LITTLE ROCK

TRACK 2

16

Musical notation for measure 16 in bass clef, 4/4 time. The notes are: G2 (quarter), F2 (quarter), E2 (quarter), D2 (quarter), C2 (half). A bar line follows. Then: B1 (quarter), A1 (quarter), G1 (quarter), F1 (quarter), E1 (half). A bar line follows. Then: D1 (half), C1 (half).

COUNT: 1 2 - 3 4

A musical staff in bass clef showing the bass line of the song. The melody consists of the following notes: G2 (half note), F2 (quarter note), E2 (quarter note), D2 (half note), C2 (half note), B1 (quarter note), A1 (quarter note), G1 (half note), F1 (quarter note), E1 (quarter note), D1 (half note), and C1 (half note). The staff ends with a double bar line.

KINDA FOLKY

TRACK 3

17 

A musical score for the bass line of the song 'The Rose Tree'. The notation is written on a single five-line staff with a bass clef. The melody consists of a series of eighth and quarter notes, starting on a low G and ending on a low C. The notes are: G2, A2, B2, C3, D3, E3, F3, G3, A3, B3, C4, D4, E4, F4, G4, A4, B4, C5, D5, E5, F5, G5, A5, B5, C6, D6, E6, F6, G6, A6, B6, C7, D7, E7, F7, G7, A7, B7, C8, D8, E8, F8, G8, A8, B8, C9, D9, E9, F9, G9, A9, B9, C10, D10, E10, F10, G10, A10, B10, C11, D11, E11, F11, G11, A11, B11, C12, D12, E12, F12, G12, A12, B12, C13, D13, E13, F13, G13, A13, B13, C14, D14, E14, F14, G14, A14, B14, C15, D15, E15, F15, G15, A15, B15, C16, D16, E16, F16, G16, A16, B16, C17, D17, E17, F17, G17, A17, B17, C18, D18, E18, F18, G18, A18, B18, C19, D19, E19, F19, G19, A19, B19, C20, D20, E20, F20, G20, A20, B20, C21, D21, E21, F21, G21, A21, B21, C22, D22, E22, F22, G22, A22, B22, C23, D23, E23, F23, G23, A23, B23, C24, D24, E24, F24, G24, A24, B24, C25, D25, E25, F25, G25, A25, B25, C26, D26, E26, F26, G26, A26, B26, C27, D27, E27, F27, G27, A27, B27, C28, D28, E28, F28, G28, A28, B28, C29, D29, E29, F29, G29, A29, B29, C30, D30, E30, F30, G30, A30, B30, C31, D31, E31, F31, G31, A31, B31, C32, D32, E32, F32, G32, A32, B32, C33, D33, E33, F33, G33, A33, B33, C34, D34, E34, F34, G34, A34, B34, C35, D35, E35, F35, G35, A35, B35, C36, D36, E36, F36, G36, A36, B36, C37, D37, E37, F37, G37, A37, B37, C38, D38, E38, F38, G38, A38, B38, C39, D39, E39, F39, G39, A39, B39, C40, D40, E40, F40, G40, A40, B40, C41, D41, E41, F41, G41, A41, B41, C42, D42, E42, F42, G42, A42, B42, C43, D43, E43, F43, G43, A43, B43, C44, D44, E44, F44, G44, A44, B44, C45, D45, E45, F45, G45, A45, B45, C46, D46, E46, F46, G46, A46, B46, C47, D47, E47, F47, G47, A47, B47, C48, D48, E48, F48, G48, A48, B48, C49, D49, E49, F49, G49, A49, B49, C50, D50, E50, F50, G50, A50, B50, C51, D51, E51, F51, G51, A51, B51, C52, D52, E52, F52, G52, A52, B52, C53, D53, E53, F53, G53, A53, B53, C54, D54, E54, F54, G54, A54, B54, C55, D55, E55, F55, G55, A55, B55, C56, D56, E56, F56, G56, A56, B56, C57, D57, E57, F57, G57, A57, B57, C58, D58, E58, F58, G58, A58, B58, C59, D59, E59, F59, G59, A59, B59, C60, D60, E60, F60, G60, A60, B60, C61, D61, E61, F61, G61, A61, B61, C62, D62, E62, F62, G62, A62, B62, C63, D63, E63, F63, G63, A63, B63, C64, D64, E64, F64, G64, A64, B64, C65, D65, E65, F65, G65, A65, B65, C66, D66, E66, F66, G66, A66, B66, C67, D67, E67, F67, G67, A67, B67, C68, D68, E68, F68, G68, A68, B68, C69, D69, E69, F69, G69, A69, B69, C70, D70, E70, F70, G70, A70, B70, C71, D71, E71, F71, G71, A71, B71, C72, D72, E72, F72, G72, A72, B72, C73, D73, E73, F73, G73, A73, B73, C74, D74, E74, F74, G74, A74, B74, C75, D75, E75, F75, G75, A75, B75, C76, D76, E76, F76, G76, A76, B76, C77, D77, E77, F77, G77, A77, B77, C78, D78, E78, F78, G78, A78, B78, C79, D79, E79, F79, G79, A79, B79, C80, D80, E80, F80, G80, A80, B80, C81, D81, E81, F81, G81, A81, B81, C82, D82, E82, F82, G82, A82, B82, C83, D83, E83, F83, G83, A83, B83, C84, D84, E84, F84, G84, A84, B84, C85, D85, E85, F85, G85, A85, B85, C86, D86, E86, F86, G86, A86, B86, C87, D87, E87, F87, G87, A87, B87, C88, D88, E88, F88, G88, A88, B88, C89, D89, E89, F89, G89, A89, B89, C90, D90, E90, F90, G90, A90, B90, C91, D91, E91, F91, G91, A91, B91, C92, D92, E92, F92, G92, A92, B92, C93, D93, E93, F93, G93, A93, B93, C94, D94, E94, F94, G94, A94, B94, C95, D95, E95, F95, G95, A95, B95, C96, D96, E96, F96, G96, A96, B96, C97, D97, E97, F97, G97, A97, B97, C98, D98, E98, F98, G98, A98, B98, C99, D99, E99, F99, G99, A99, B99, C100, D100, E100, F100, G100, A100, B100, C101, D101, E101, F101, G101, A101, B101, C102, D102, E102, F102, G102, A102, B102, C103, D103, E103, F103, G103, A103, B103, C104, D104, E104, F104, G104, A104, B104, C105, D105, E105, F105, G105, A105, B105, C106, D106, E106, F106, G106, A106, B106, C107, D107, E107, F107, G107, A107, B107, C108, D108, E108, F108, G108, A108, B108, C109, D109, E109, F109, G109, A109, B109, C110, D110, E110, F110, G110, A110, B110, C111, D111, E111, F111, G111, A111, B111, C112, D112, E112, F112, G112, A112, B112, C113, D113, E113, F113, G113, A113, B113, C114, D114, E114, F114, G114, A114, B114, C115, D115, E115, F115, G115, A115, B115, C116, D116, E116, F116, G116, A116, B116, C117, D117, E117, F117, G117, A117, B117, C118, D118, E118, F118, G118, A118, B118, C119, D119, E119, F119, G119, A119, B119, C120, D120, E120, F120, G120, A120, B120, C121, D121, E121, F121, G121, A121, B121, C122, D122, E122, F122, G122, A122, B122, C123, D123, E123, F123, G123, A123, B123, C124, D124, E124, F124, G124, A124, B124, C125, D125, E125, F125, G125, A125, B125, C126, D126, E126, F126, G126, A126, B126, C127, D127, E127, F127, G127, A127, B127, C128, D128, E128, F128, G128, A128, B128, C129, D129, E129, F129, G129, A129, B129, C130, D130, E130, F130, G130, A130, B130, C131, D131, E131, F131, G131, A131, B131, C132, D132, E132, F132, G132, A132, B132, C133, D133, E133, F133, G133, A133, B133, C134, D134, E134, F134, G134, A134, B134, C135, D135, E135, F135, G135, A135, B135, C136, D136, E136, F136, G136, A136, B136, C137, D137, E137, F137, G137, A137, B137, C138, D138, E

NOTES ON THE A STRING

B

C

A

B

C

These notes are in 1st position. Remember to say the note names out loud as you play.

Practice slowly, to get the notes securely under your fingers. When you feel comfortable with an example, gradually increase the speed.

TRACK 5

YOU GO, SLAV

27

REPEAT SIGN

When a section of music needs to be repeated, a **repeat sign** (:||) is used. When you reach the repeat sign, go back to the beginning and play the section again, ending at the last measure.

TRACK 6

ONE MORE TIME

28

The next group of exercises will use notes on the E and A strings. Go back and review the E string notes if you need to. Use the rake technique—marked with an asterisk (*)—when crossing from the A string down to the E string.

29

This exercise adds F# in measure 6. Use the fingering shown. Take the repeat.

TRACK 7

CATTLE CROSSING

30

MORE NOTES ON THE A STRING

Just like the E string, the A string has notes that occur in between the natural notes.

A[#]/B^b

C[#]/D^b

A[#]/B^b is in 1st position

C[#]/D^b is in 2nd position

This example uses A[#] with the first finger. It is in 1st position.

This example is also 1st position; it uses B^b with the first finger.

This example is in 2nd position (make sure your first finger is on the 2nd fret).

THE FINGER ROLL

A special technique for the left hand is the **finger roll**. This helps you when playing notes on adjacent strings located at the same fret. The goal is to cross smoothly from one string to the next. To do this when moving from a lower to a higher string, play the note on the lower string using the tip of the finger (with the small knuckle slightly bent); then, flatten the knuckle and roll your finger across, playing the note on the higher string with the pad of the finger.

This example thoroughly works the finger roll on all fingers. Observe the position shifts indicated.

TRACK 8

ROLL IT

This 2nd position exercise has several string crossings (and uses A^b on the way down from open A). In measures 3 and 4, there are finger rolls between G and C.

TRACK 9

ROLLY

THE 12-BAR BLUES

Let's play a longer song form, a **12-bar blues**. This is a common progression in rock, jazz, blues, and many other styles of music. The bass line corresponds directly to **chords** that a guitarist or pianist plays. They will be written above each measure so that your teacher or a friend can play along with you. If you examine the bass line, you will see that when the chord symbol says E7, the bass starts the measure with an E; when the chord changes to A7, the bass plays A; etc. You are playing the *root* of the chord, a very important aspect of functional bass playing.

TRACK 10

12-BAR BLUES

NOTES ON THE D STRING

D

OPEN

E

2nd FRET

F

3rd FRET

D

E

F

When playing on the D string, remember to drop your right-hand thumb to the E string to keep it muted. Pull straight across with the finger and into the A string. Pick style players: concentrate on your pick accuracy and touch. Don't play the D string too hard.

PRIVATE EYE

TRACK 12

This 1st position example crosses the A and D strings. The chord names are included so others can play along. You are playing the root when each chord changes. The symbol “Dm” is for a D minor chord. **Minor chords** sound dark while **major chords** (without the “m”) sound happy and bright. Listen for the difference. Watch out for the finger roll in the last measure.

MINOR LEAGUE

TRACK 13

1ST and 2ND ENDINGS

The next song has a **1st** and **2nd ending** (indicated with brackets and the numbers “1” and “2”). Play through the 1st ending like a standard repeat sign, and go back to the beginning. The second time through, skip the entire 1st ending and go directly to the 2nd ending section.

This example starts and ends on D; it outlines the sound of the **key** of D. D is the **tonic** or “home base” of the piece. Notice how the bass is not always playing the root when the chords change. You can play other notes that belong to the chord. (This will be explained in depth in Book 2.)

D-LITE

TRACK 14

MORE NOTES ON THE D STRING

D[#]/E^b

D[#] E^b

D[#]/E^b is in 1st position

F[#]/G^b

F[#] G^b

F[#]/G^b is in 2nd position

Remember to start in 2nd position.

This example shifts between 1st and 2nd position.

THREE-STRING REVIEW

Here are all the notes you have learned so far. Review each note and solidify your understanding of where it is played on the fingerboard and how it is written on the staff.

D	D [#] /E ^b	E	F	F [#] /G ^b
A	A [#] /B ^b	B	C	C [#] /D ^b
E	F	F [#] /G ^b	G	G [#] /A ^b

D STRING

D D[#] / E^b E F F[#] / G^b

A STRING

A A[#] / B^b B C C[#] / D^b

E STRING

E F F[#] / G^b G G[#] / A^b

This 2nd position example crosses the three strings you've learned so far. Make sure to follow the 1st and 2nd endings.

TRACK 15

CROSSIN' THREE

46 E A D A

E A G 1. D G

2. D G A D E

THE OCTAVE

It's time to look at a musical pattern that is very common in bass playing, the "octave." An **octave** is the same note up or down eight letters in the musical alphabet. For instance, the last two notes in the previous example were both E, but one was high, and one was low—that is an octave.

		octave							
musical alphabet -		E	F	G	A	B	C	D	E
		1	2	3	4	5	6	7	8

The octave follows a physical pattern on the fingerboard. From any note on the E (or A) string, move up 2 frets, and across 2 strings. This pattern is consistent throughout the fingerboard.

Fingering an octave (without an open string) requires you to play the low note with the first finger, and the high note with the fourth finger.

For fingerstyle, use your index finger (i) for the low note of an octave and your middle finger (m) for the high note.

This example uses the octave shape. For fingerstyle, make sure to drop the right thumb onto the E string when making the jump across to play the D string. This example also shifts up with the first finger to 2nd position. Shifting around the octave shape is a very common practice in bass playing.

G major is the tonic. Start in 1st position, but shift in the 6th measure. Use the open D string to move to 2nd position.

58

FNG: 4 0 1 2

4 0 - 1 4 0 1 4 0

MORE OCTAVES

Playing across all four strings, there are more octave shapes available. Here are the new octaves you can play between the A and G strings. Remember that A \sharp and B \flat are enharmonic equivalents.

59

FNG: 0 2 1 4 1 4 1 4

1st POSITION -----| 2nd POSITION

Now let's use all the octaves you've learned so far. The shifts are indicated with a dash "-".

60

FNG: 0 2 1 4 1 0 2 1 4 1 -

1 4 1 4 1 - 1 4 1 4 1 0

Because both notes of an octave are the same letter, they can both be considered the root of a chord. On an E chord, for example, both low and high E are the root. Understanding this concept will help you to create your own bass lines.

This 12-bar blues uses the octave on each chord for the bass line. The chords are "seventh chords" (E7, A7, and B7). They are a different type of chord than you've seen, but for now the important thing is to play the root (E, A, and B).

Begin in 1st position; for the B7 chord, shift up to 2nd position. Remember, when playing octaves fingerstyle, the lower note of the octave can be muted with the thumb as you move up to play the higher note on the A or D string. As a general rule, use your middle finger (m) when jumping to the higher note, and your index finger (i) when jumping back down to the low octave.

TRACK 21

61

E7

A7 E7

B7 A7 E7 B7

FNG: 1 4 1 - 0 2 0

TIES

A **tie** connects two notes of the same pitch. It is used to extend the note value across a bar line, or sometimes within a measure. Play the first note, and hold it for the combined value of both notes.

62 

A musical staff in bass clef showing the bass line for 'The Rose Tree'. The melody consists of a series of eighth and quarter notes, with some beamed together. Below the staff, there are two brackets indicating fingerings: the first bracket covers the first four notes and is labeled '3 - 4 - 1 - 2'; the second bracket covers the next four notes and is labeled '4 - 1 - 2'.

In this example, some of the chords change on the first beat of a tie. The key is B minor; notice the darker quality of the song.

TRACK 22

TAIWAN ON

63  4/4

Bm E Bm G

4 - 1 - 2 4 - 1

Handwritten musical notation for the bass line of "Hotel California". The notation is on a single staff with a bass clef. It shows a sequence of notes corresponding to the chords G, A, Bm, and G. The notes are: G (low), A, B, C, D, E, F# (sharp), G, A, B, C, D, E, F# (sharp), G. The notes are grouped into measures by vertical bar lines. The first measure is G, the second is A, the third is Bm, and the fourth is G. The notes are written in a simple, handwritten style. Below the staff, there are fingerings: "1 - 2 - 3 - 4 - 1" for the first measure, "4 - 1 - 2" for the second measure, and "4 -" for the third measure.

Musical notation for the bass line of "The Sound of Silence". The notation is on a single staff with a bass clef. It consists of two measures. The first measure contains a whole note G2 (one ledger line below) and a whole note A2 (below the staff). The second measure contains a whole note B1 (below the staff), a whole note C2 (below the staff), a whole note D2 (below the staff), and a whole note E2 (below the staff). Above the staff, the chord symbols "F#7" and "Bm" are written. Below the staff, the fingerings "1 - 2" and "4 - 1" are indicated.

3/4 TIME & THE DOTTED HALF NOTE

3/4 time has three beats per measure, and the quarter note receives one count.

3 → three beats per measure
4 → a quarter note (♩) gets one beat

A **dot** after a note extends the note's duration by one-half. A **dotted half note** equals 3 beats.

$$\begin{array}{ccccc} \text{♩} & + & \text{.} & = & \text{♩.} \\ \text{two beats} & & \text{one beat} & & \text{three beats} \end{array}$$

COUNT: 1 2 3 1 2 - 3 1 - 2 3 1 - 2 - 3

64

RESTS

Rests are spaces, or silences, in the music, and have specific durations just like notes. In fact, for every note value, there is a corresponding rest of equal value.

WHOLE REST HALF RESTS DOTTED HALF REST QUARTER RESTS

1 - 2 - 3 - 4 1 - 2 3 - 4 1 - 2 - 3 1 2 3 4

It's important to make sure your notes are not still ringing during a rest. Mute the string with your right or left hand, whichever is most convenient.

68 

Musical notation for the bass line of 'The Rose Tree'. The notation is on a single staff with a bass clef. It consists of five measures. The first measure contains a whole note G2. The second measure contains a whole rest. The third measure contains two eighth notes, G2 and A2, beamed together. The fourth measure contains two eighth notes, G2 and F2, beamed together. The fifth measure contains a whole note G2.

[illegible]

Although the count is written out only for the first line, keep counting on your own for lines 2–4. Make sure to hold the quarter notes for their full note value.

ROCK 'N' REST

TRACK 26

69

E D E D B

COUNT: 1 2 3 4 1 2 3 - 4 1 2 3 4 1 2 3 - 4

A musical staff in bass clef showing the bass line for 'The Rose Tree'. The staff is divided into four measures by vertical bar lines. Above the staff, the notes C, D, E, and D are written in bold black letters, corresponding to the notes in each measure. The first measure (C) contains four eighth notes. The second measure (D) contains two eighth notes, a quarter rest, and a quarter note. The third measure (E) contains a quarter note, two quarter rests, and a quarter note. The fourth measure (D) contains a quarter note, a quarter rest, and a half note. The staff ends with a double bar line and repeat dots.

*N.C. G A N.C. G A

*N.C. = No chord

A musical staff in bass clef showing the bass line for 'The Rose Tree'. The staff is divided into measures by bar lines. Above the staff, the notes G, A, B, D, and E are written in large, bold letters. The first measure is labeled 'N.C.' (No Chord) and contains a whole rest. The second measure contains a half note G. The third measure contains a half note A. The fourth measure contains a half note B. The fifth measure contains a half note D. The sixth measure contains a half note E. The staff ends with a double bar line.

D.C. al FINE

The marking **D.C. al Fine** is short for “Da Capo al Fine,” an Italian phrase meaning, “From the beginning until the end.” When you see this marking in a piece of music, go back to the beginning (or “head”) of the piece and resume playing until you reach the Fine marking (the “end”), and then stop.

This piece has a jazz-waltz feel. Count through the rests and ties. Note that the root is not always played on each chord.

TRACK 27

THREE PLAY

70

1 2 3

This time, take the D.C. and play the 1st ending back to the beginning; the Fine is the 2nd ending.

71

COUNT: 1 2 3 4 1 2 3 4

1. 1 2 3 4 1 2 3 4

2. Fine

D.C. al Fine (take repeat)

EIGHTH NOTES

When you divide a quarter note in half, you get two **eighth notes**. Eighth notes are written separately with flags, or in groups of two or more with beams.

In 4/4 and 3/4 time, there are two eighth notes per beat. To count eighth notes, we use the word “and,” like this: “1 & 2 & 3 & 4 &.” The numbers are called **downbeats**, and the “ands” are called **upbeats**.

For fingerstyle playing, continue alternating index and middle fingers when playing eighth notes. For pick style playing, alternate downstrokes with upstrokes. Use downstrokes (▮) on the downbeats and upstrokes (v) on the upbeats.

Play the following exercise slowly at first. Count aloud, tapping your foot on the downbeats. Keep the count going for yourself on the 2nd and 3rd lines. Then try it again, reversing the fingerings (start with “m”).

72A

Here's the same exercise played pick style.

72B

For additional practice, try playing each measure individually in a repetitive loop (you'll need to adjust the right-hand fingerings if playing fingerstyle). Add one measure at a time, and eventually play through the entire exercise.

This tune combines eighth notes with moving lines. Practice keeping the eye moving ahead fast enough to follow the notes. Make sure to count through the rests.

TRACK 28

MOVIN' 8'S

73

COUNT: 1 2 + 3 4 + 1 + 2 3 + 4 1 + 2 + 3 4 1 2 3 + 4 +

This is in 1st position. F is the tonic or key. Watch for the finger roll with the fourth finger in the last measure.

74

Notice the use of a consistent idea here; it contributes to a solid bass line. Repetition in the bass part gives a song a feeling of stability and a sense of character.

TRACK 29

EIGHT BALL

75

COUNT: 1 + 2 + 3 - 4

1.

D.C. al Fine (take repeat)

EIGHTH RESTS

An **eighth rest** takes up the same amount of space as an eighth note. Eighth rests can occur on a downbeat or an upbeat.

EIGHTH RESTS

1 + 2 + 3 + 4 +

EIGHTH NOTES AND RESTS

1 + 2 + 3 + 4 +

Play this example slowly. Tap your foot on the downbeats, and keep counting out loud through the second line. Practice each measure of this exercise separately until you get comfortable with the feel of it, then string them all together. Fingerstyle, continue to alternate index and middle fingers. Pickstyle, keep downstrokes on downbeats and upstrokes on upbeats.

76

COUNT: 1 + 2 + 3 + 4 + 1 + 2 + 3 + 4 + 1 + 2 + 3 + 4 +

This example uses a two-measure rhythmic pattern to create a consistent feel. There is a slight variation in measure 7.

TRACK 30

BOP BOP

78

COUNT: 1 + 2 + 3 - 4 1 + 2 + 3 - 4

1 + 2 + 3 4

D.C. al CODA

Like “D.C. al Fine,” this marking tells you to return to the beginning of the piece. But “al Coda” indicates that you jump to the coda or “tail” section when you reach the appropriate marking. Here is an example with numbered instructions.

1) Play through piece —————
3) “D.C.” (the top) 4) skip from here *To Coda* \oplus 2) return to top *D.C. al Coda*

5) to here ————— \oplus *Coda* 6) the end

The example consists of two staves of music in bass clef. The first staff has four measures of eighth notes. Above the first measure is instruction 1. Above the second measure is instruction 3. Above the third measure is instruction 4, with a line pointing to a Coda symbol (\oplus). Above the fourth measure is instruction 2, with a line pointing back to the beginning of the first measure. The second staff has four measures: the first three are eighth notes, and the fourth is a whole note. Above the third measure is instruction 5, with a line pointing to a Coda symbol (\oplus). Above the fourth measure is instruction 6.

Pay attention to the form of this piece: 1) Take the repeat sign to the top, 2) play through to the second half of the song, 3) follow the D.C. al Coda back to the top, and, 4) at the coda sign, skip to the bottom of the page and play the coda measure.

TRACK 32

CODA PENDANT

79

The notation for 'CODA PENDANT' consists of four staves of music in bass clef, 4/4 time. Above the first staff are chords E, A, B, and A. Above the second staff are chords E, A, G, A, and B, followed by 'To Coda' and a Coda symbol (\oplus). Above the third staff are chords C, G, C, and G. Above the fourth staff are chords C, G, B \flat , G, and A, followed by 'D.C. al Coda (no repeat)'. The first staff has a measure of eighth notes, followed by a measure of eighth notes, a measure of eighth notes, and a measure of eighth notes with a 1+2+3+4+ count. The second staff has a measure of eighth notes, a measure of eighth notes, a measure of eighth notes, a measure of eighth notes, and a measure of eighth notes. The third staff has a measure of eighth notes, a measure of eighth notes, a measure of eighth notes, and a measure of eighth notes. The fourth staff has a measure of eighth notes, a measure of eighth notes, a measure of eighth notes, a measure of eighth notes, and a measure of eighth notes. Below the fourth staff is a Coda symbol (\oplus) followed by the word 'Coda' and the chord 'E'. Below this is a single measure of music in bass clef, 4/4 time, consisting of a whole note.

Staying on the root and “pumping out” eighth notes is a classic approach in rock bass playing. Pick style players may want to try the above song again, using all downstrokes (▮). This option will give you a heavier sound than alternate picking (downstrokes and upstrokes) and is useful for some songs and styles.

The form of this piece is the same as the previous example, but now the first half of the song is called the A section, and the second half, the B section. These **rehearsal letters** make it easier to keep your place in longer songs and are a handy reference point when talking to other musicians.

USING A METRONOME

An important aspect of bass playing is keeping a steady tempo. A **metronome** will help you do this. Use an electronic or battery-powered model. First, learn an exercise slowly, and make sure you can play it correctly. Then, use a metronome to develop your tempo.

- Set your metronome to a slow tempo—50 beats per minute (bpm), for example.
- Let the click become the quarter-note pulse. Count along with it, “1, 2, 3...”
- Look at the exercise without the bass, and practice reading along with the click (e.g., “G, A, B...”).
- Pick up your bass and read through the exercise with the click. Do your best to stay with the tempo.
- As you get more comfortable with the click, gradually speed up the tempo.

THE CLASSIC RHYTHM

The **dotted quarter/eighth note** combination (the “classic rhythm”) is one of the most common in bass playing. Remember, a dot adds one half the value of whatever note it sits next to. A *dotted quarter note* equals the value of three eighth notes ($\text{J.} = \text{J} + \text{J}$). The classic rhythm is commonly used in one of two variations, and can be applied to many styles of music.

Practice the rhythm slowly, and count out loud. Once familiar with it, use a metronome clicking quarter notes.

Now use the classic rhythm with a moving line. Keep counting through the second line.

Now we start to add occasional eighth notes to the line. They add interest but keep the feel consistent.

TRACK 34

DOWN HOME

This one uses the classic rhythm in a bluesy, R&B style.

TRACK 35

RAITT ON

85

A CLASSIC VARIATION

Sometimes the classic rhythm is played short: a quarter note followed by an eighth rest, with an eighth note on the up-beat. The space from the rest leaves room for the snare drum to hit on beats 2 and 4, giving the music a tight feel. To create the rest, simply mute the quarter note—either by lifting off the note with the left hand, or placing your plucking finger on the string.

When you get comfortable with this, use the metronome with a quarter-note click. Listen for the space left by the rest.

Here is a blues with the shortened classic rhythm.

THE BOX SHAPE

The **box shape** is a common four-note pattern found in all styles of bass playing. It forms a square shape on the fingerboard that can be easily moved. The lowest note in the pattern is the root, and the highest note is the octave.

E BOX

FNG: 0 2 0 2

A BOX

FNG: 0 2 0 2

B BOX

FNG: 1 4 1 4

For octave jumps off the E string, place the right-hand thumb on the E string while playing the higher notes on the D string. Use the left hand to mute the open D string in measure 3.

E BOX

For octave jumps off the A string, rest the right thumb on the A string and lean it against the E string while playing the higher notes on the G string. Use the left hand to mute the open G string in measure 3.

A BOX

The B box has no open strings—so the fingering can be moved around the fingerboard easily. More on that soon.

E F G

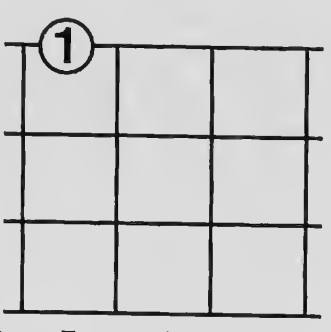

5TH POSITION

So far, we've played in 1st, 2nd, and 3rd positions. Let's continue to expand our knowledge of the fingerboard; playing in 5th position will give us access to a few new notes as well as alternate fingerings for notes we've already learned.

ON THE G STRING

Place your first finger on the 5th fret of the G string. We are still using the 1-2-4 fingering system.

C

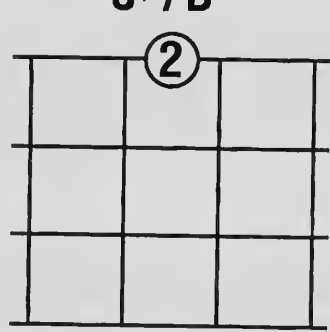

fret: 5 6 7

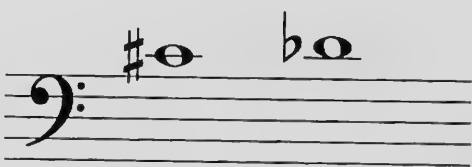

C

C[#]/D^b

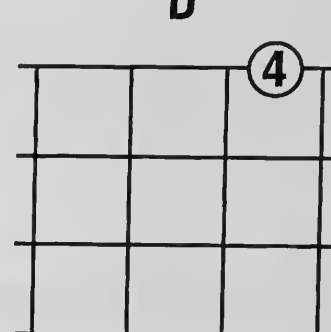

fret: 5 6 7

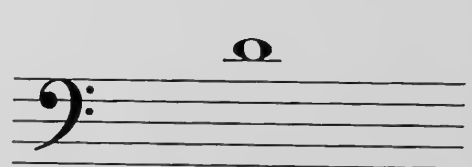

C[#] D^b

D

fret: 5 6 7

D

To get more comfortable with the notes in this position, say them aloud as you play: "C, C[#], D..."

14

FNG: 1 2 4 2 1 4 1 1 2 4 1

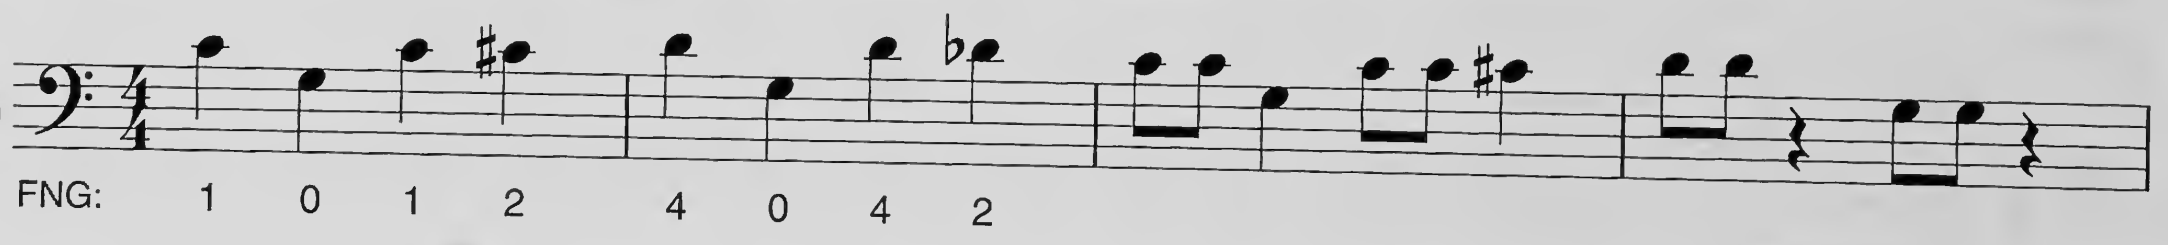

15

FNG: 1 1 4 1 4 1 1 2 4 1

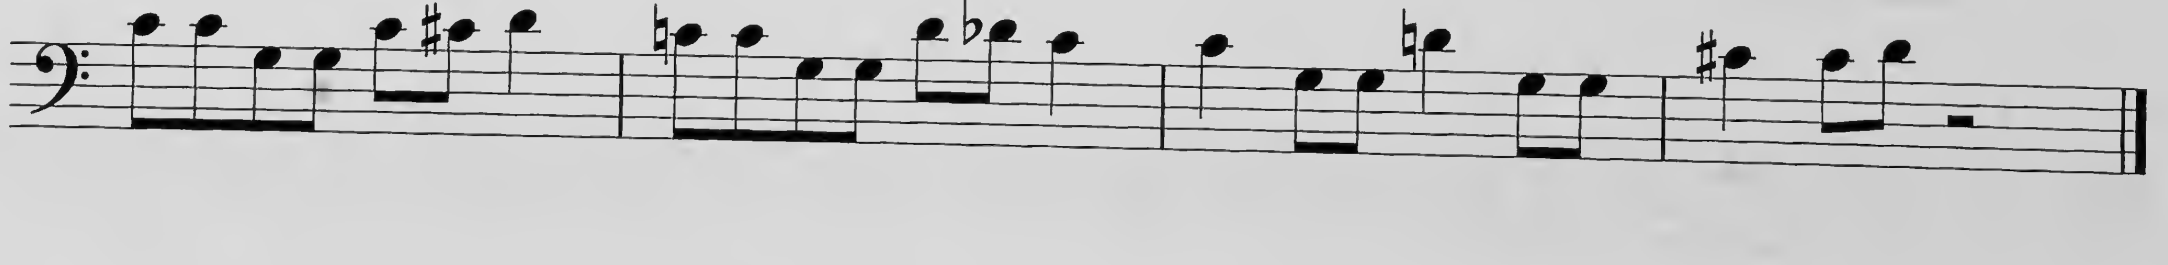

This example uses the open G string—keep the hand in 5th position and play the open string.

16

FNG: 1 0 1 2 4 0 4 2

17

FNG: 1 0 1 2 4 0 4 2

SHIFT PRACTICE

Many bass lines require you to play in several positions. It's important to be comfortable shifting between positions. Release the finger pressure before making the shift, and land on the new note as gently as possible.

Practice the shifts in example A individually, back and forth. Make the shifts as smooth as possible. Example B shifts from 5th position down to the open G, and back up.

A 5th - 3rd 3rd - 5th 5th - 3rd 3rd - 5th 5th - 2nd 2nd - 5th

FNG: 1 1 4 4 4 1 1 1 4 1 4 1

B 5th ----- 2nd ----- open ----- 1st ----- 2nd ----- 5th

4 1 4 1 0 1 4 4 1 4

This example shifts between 3rd and 5th position.

18

FNG: 1 2 4 1 - 1 1 2 4 2 1 0 -

4 4 2 1 - 1 4 1 - 4 1 - 1

This example has many shifts. The important fingerings are marked, and all shifts are indicated by the “-” symbol.

This example bounces off the open A string but stays in 5th position.

30

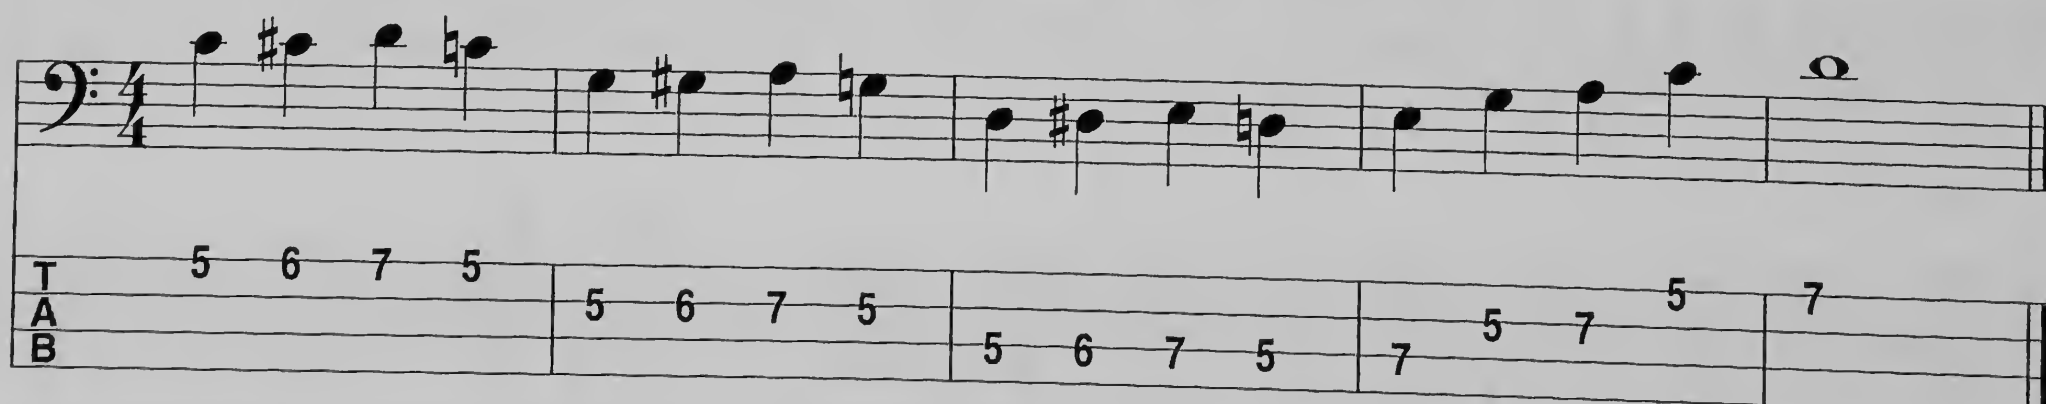

FNG: 1 1 0 1 1 2 2 4 4 0 4 0 4 2

INTRODUCING TABLATURE

Tablature is a system of notating the specific location of notes on the fingerboard. In 5th position, there are many notes that could be played elsewhere on the neck; tablature (or "tab") is a handy way to indicate where they are best played.

The tab staff is 4 lines: the bottom line represents the E string; the next line is the A string, then the D string, and then the G string. Numbers on the lines represent frets. For each note on the staff, there will be a number in tab indicating the exact fret location of that note.

T 5 6 7 5

A 5 6 7 5

B 5 6 7 5

G 7 5 7 5 7

This example uses tablature to clearly indicate where the notes are played.

ON THE E STRING

Here are the notes on the E string in 5th position. These notes are also found on the A string: open, 1st fret, and 2nd fret. These examples use 5th position.

A

fret: 5 6 7

5th FRET

A

A#/Bb

fret: 5 6 7

6th FRET

A# Bb

B

fret: 5 6 7

7th FRET

ONE FINGER PER FRET

Another fingering system commonly used on the bass assigns one finger to each fret. This expands what is available under your hand by one more note. This system is *not* advisable for box shapes as it puts too much strain on the hand. To use OFPF without strain, you must learn to use the **pivot** in the left hand between the 2nd and 3rd finger. Play a note with the 1st finger, then lay down the 2nd finger. When moving to the 3rd finger, release the 1st finger and pivot slightly on the 2nd finger and thumb to reach the note with the 3rd finger. Lay down the 4th finger next. Pivoting like this eliminates the need to stretch the hand open to reach the notes. Extended periods of stretching open your hand can be painful and potentially damaging. Stay relaxed and flexible as much as possible.

Practice playing across all four strings with OFPF. When you've reached the last note, reverse directions and come back down.

FNG: 1 2 3 4 1 2 3 4 1 2 3 4 1 2 3 4

pivot

THE MAJOR SCALE

The **major scale** is a group of 8 notes that occur in a specific order. It is the basis of most popular music and is an important tool in developing an understanding of how music is structured.

The major scale is constructed by combining *whole steps* (the distance between 2 frets) and *half steps* (1 fret) in this pattern:

C MAJOR SCALE

whole whole half whole whole whole half

C D E F G A B C

Scale # 1 2 3 4 5 6 7 8

Each note in the scale is numbered 1 through 8. The 1st (and 8th) note is called the root or tonic (in this case, C). It is the note that gives the scale its name or **key**, and sounds like “home base.” The numerical system is used to describe melodies, root motion, and many other musical elements.

Using the OFPF system and starting on the 2nd finger, the major scale falls naturally under the hand in one position. This is the “**universal fingering**” for the major scale; it will produce the scale in any key starting from the 2nd fret and above on the E or A strings. Here it is in C major.

major scale

41

FNG: 2 4 1 2 4 1 3 4 4 3 1 4 2 1 4 2

TAB: 3 5 2 3 5 2 4 5 5 4 2 5 3 2 5 3

42

FNG: 2 1 4 2 1 4 2 1 4 3 1 4 3 4 4

TAB: 3 2 5 3 2 5 3 2 5 4 2 5 4 5 5

FNG: 5 2 4 5 2 3 5 2 3 5 2 3 5 2 3

TAB: 5 2 4 5 2 3 5 2 3 5 2 3 5 2 3

43

FNG: 2 4 1 2 4 2 | 4 1 2 4 1 4 | 1 2 4 1 3 1 | 2 4 1 3 4 2

TAB: 3 5 2 3 5 3 | 5 2 3 5 2 5 | 2 3 5 2 4 2 | 3 5 2 4 5 3

Remember: When using the OFPF system to play notes in a single position like this, allow your left hand to pivot naturally between the 2nd and 3rd fingers; always keep the hand relaxed.

The next two examples use the number system exclusively. Using the universal fingering in the key of C position, play the notes that correspond to the scale numbers. Say the scale numbers aloud. Pay attention to the note names as well.

TRACK 18

SCALE SEQUENCE #1

5 6 7 5 | 6 7 8 6 | 5 4 3 2 | 3 2 1 4

KEY SIGNATURES

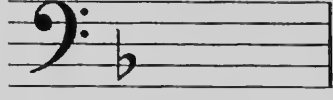

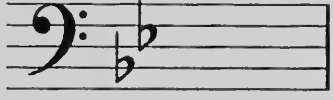

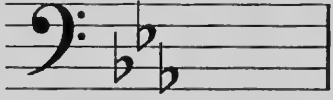

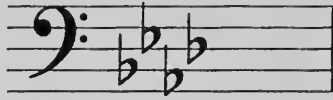

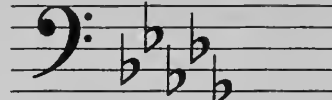

If you examine the notes in the key of C, you'll notice that there are no sharps or flats. The half steps in the scale (between 3 & 4 and 7 & 8) naturally occur between E & F and B & C. In different keys, it is necessary to add sharps or flats to maintain the sequence of whole and half steps that produce the major scale.

Each new key has its own unique **key signature** that indicates which notes are sharp or flat. It appears at the beginning of a line of music. Here are the key signatures for keys up to 5 sharps and 5 flats.

SHARP KEYS

				
G MAJOR	D MAJOR	A MAJOR	E MAJOR	B MAJOR

FLAT KEYS

				
F MAJOR	B ^b MAJOR	E ^b MAJOR	A ^b MAJOR	D ^b MAJOR

Sharps or flats indicated in the key signature are played automatically unless cancelled out by a natural sign (♮).

To get familiar with the above keys, play them first in **open position**—that is, starting on the lowest possible root on the finger-board, and using as many open strings as possible. Some of these keys/scales will be easier to play this way than others. The keys of G, A, E, F, and B^b will be especially useful. Use the 1-2-4 fingering system, and refer to the fingerings and shifts as needed.

Play each scale several times, and be sure to watch for sharps and flats. Say the note names as you play.

In 2nd position.

G MAJOR

FNG: 2 0 1 2 0 1 4 0

G A B C D E F[#] G

Start in 2nd position; shift up to 5th position.

D MAJOR

FNG: 0 1 4 0 1 4 - 2 4

D E F[#] G A B C[#] D

Start in 2nd position; shift down to 1st position.

A MAJOR

FNG: 0 1 4 0 1 4 - 1 2

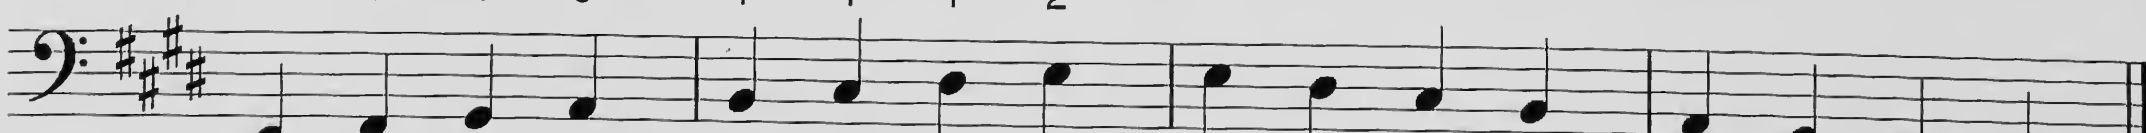

A B C[#] D E F[#] G[#] A

Start in 2nd position; shift down to 1st position.

E MAJOR

FNG: 0 1 4 0 1 4 - 1 2

E F[#] G[#] A B C[#] D[#] E

Try the OPFP system for this one. (Start on the 2nd fret, A string.)

B MAJOR

FNG: 2 4 1 2 4 1 3 4

B C# D# E F# G# A# B

In 1st position.

F MAJOR

FNG: 1 4 0 1 4 0 2 4

F G A B^b C D E F

In 1st position.

B^b MAJOR

FNG: 1 4 0 1 4 0 2 4

B^b C D E^b F G A B^b

Start in 1st position; shift up to 5th (with a stretch).

E^b MAJOR

FNG: 1 4 0 1 4 - 1 3 4

E^b F G A^b B^b C D E^b

In 1st position. (Use OFPF at the start.)

A^b MAJOR

FNG: 4 1 3 4 - 1 4 0 1

A^b B^b C D^b E^b F G A^b

Start in 1st position, then shift up. (Again, try OFPF at the start.)

D^b MAJOR

FNG: 4 1 3 4 1 4 - 2 4

D^b E^b F G^b A^b B^b C D^b

TIP: Before playing any piece of music, check the key signature. Play the corresponding scale up and down, saying the note names aloud. You'll be warmed up and ready to play!

UNIVERSAL FINGERINGS

Of course, all the major keys can also be played with the universal fingering (2-4, 1-2-4, 1-3-4). E, B, F, and E^b are in higher positions than you've learned, but it's simple to plug in the fingering and play the scale.

Again, play each scale several times. First say the note names, then the scale numbers.

Start on the 3rd fret, E string.

G MAJOR

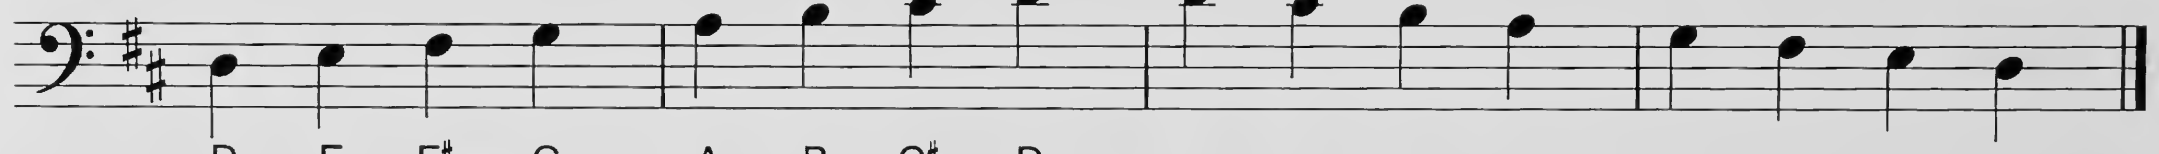

FNG: 2 4 1 2 4 1 3 4

Scale # 1 2 3 4 5 6 7 8

Start on the 5th fret, A string.

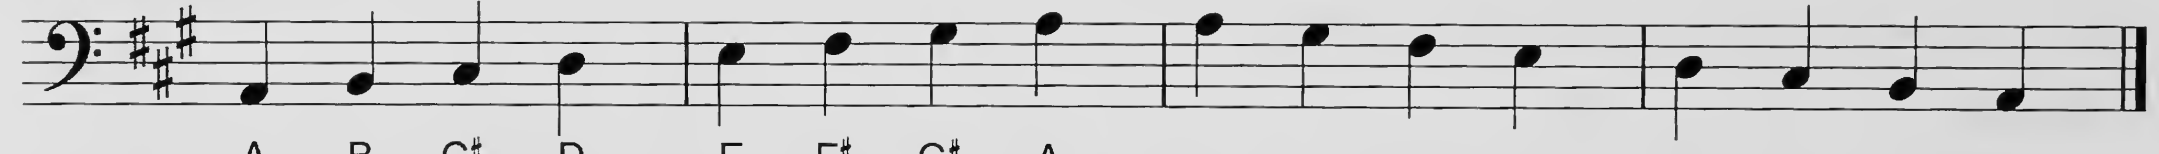

D MAJOR

D E F# G A B C# D

Start on the 5th fret, E string.

A MAJOR

A B C# D E F# G# A

Start on the 7th fret, A string.

E MAJOR

E F# G# A B C# D# E

Start on the 7th fret, E string.

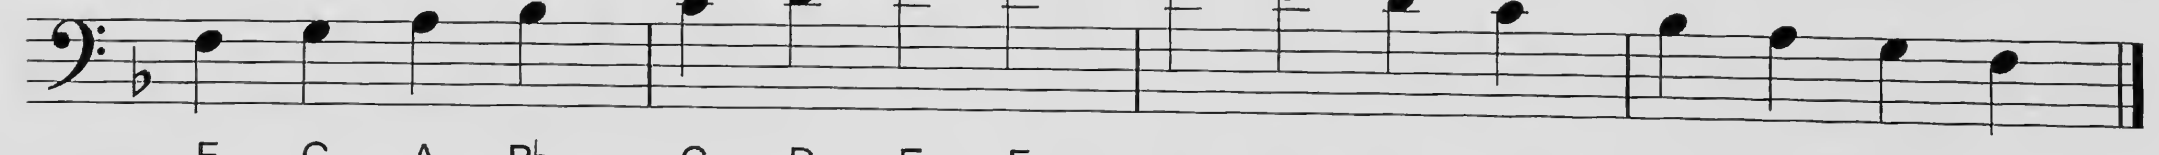

B MAJOR

B C# D# E F# G# A# B

Start on the 8th fret, A string.

F MAJOR

F G A B^b C D E F

Start on the 6th fret fret, E string.

B♭ MAJOR

Diagram of the B♭ Major scale starting on the 6th fret, E string. The scale is written on a single staff with a bass clef and a key signature of two flats (B♭ and E♭). The notes are: B♭, C, D, E♭, F, G, A, B♭. The scale is shown in a single octave, starting and ending on B♭.

Start on the 6th fret, A string.

E♭ MAJOR

Diagram of the E♭ Major scale starting on the 6th fret, A string. The scale is written on a single staff with a bass clef and a key signature of three flats (B♭, E♭, and A♭). The notes are: E♭, F, G, A♭, B♭, C, D, E♭. The scale is shown in a single octave, starting and ending on E♭.

Start on the 4th fret, E string.

A♭ MAJOR

Diagram of the A♭ Major scale starting on the 4th fret, E string. The scale is written on a single staff with a bass clef and a key signature of four flats (B♭, E♭, A♭, and D♭). The notes are: A♭, B♭, C, D♭, E♭, F, G, A♭. The scale is shown in a single octave, starting and ending on A♭.

Start on the 4th fret, A string.

D♭ MAJOR

Diagram of the D♭ Major scale starting on the 4th fret, A string. The scale is written on a single staff with a bass clef and a key signature of five flats (B♭, E♭, A♭, D♭, and G♭). The notes are: D♭, E♭, F, G♭, A♭, B♭, C, D♭. The scale is shown in a single octave, starting and ending on D♭.

Once you are comfortable with each scale in its various positions, play them all using these numerical sequences. For more practice in this area, go back to Scale Sequences #1 and #2 and play them in all keys.

SCALE SEQUENCE #3

46

Scale # 1 2 1 3 1 4 1 5 1 6 1 7 1 8 1

Diagram of Scale Sequence #3, exercise 46. The scale is written on a single staff with a bass clef and a key signature of one flat (B♭). The notes are: B♭, C, D, E♭, F, G, A, B♭. The scale is shown in a single octave, starting and ending on B♭. The sequence of notes is: 1 2 1 3 1 4 1 5 1 6 1 7 1 8 1.

SCALE SEQUENCE #4

47

Scale # 1 3 2 4 2 5 4 6 5 7 6 8 7 5 8

Diagram of Scale Sequence #4, exercise 47. The scale is written on a single staff with a bass clef and a key signature of one flat (B♭). The notes are: B♭, C, D, E♭, F, G, A, B♭. The scale is shown in a single octave, starting and ending on B♭. The sequence of notes is: 1 3 2 4 2 5 4 6 5 7 6 8 7 5 8.

Now it's time to play. Check the key signature, and play the sharps and flats as indicated. Find your own fingerings.

THE CLASSIC BLUES LINE

This very familiar bass line follows a pattern that fits right into the universal scale fingering, making it very easy to play in any key. Hint: You'll need an upper extension for the C7 and D7 chords. (Refer to the diagram below.)

In this key, the line can also be played in open position; try it both ways.

TRACK 26

GEE BLUES

major scale
(w/upper extension)

54

G7

FNG: 2 1 4 1 4 1 4 1

C7 **G7**

2 1 4 1 4 1 4 1

D7 **C7** **G7** **G7**

4 3 1 3 2 1 4 1 2 1 4 1 4 1 4 1

This line has variations in the main pattern and in measures 9 through 12. They are interchangeable with the original line. The key of A can also be played in open position, but measures 9 and 10 need to be repositioned. Can you figure out how to do it?

TRACK 27

AA, BLUES!

55

B7

A7

E7

E7

UNDERSTANDING BASS LINES

An effective way to understand bass lines is to determine the scale numbers that represent the notes. By now you can figure out the scale numbers within a key, but when chords change, you’ll sometimes find it easier to think of the notes in relationship to the new chord. The root of each new chord becomes scale number 1. In the example below, the scale numbers on the E7 chord are 1-3-5-6-8-5-3. When it moves to the A7 chord, the A (the root) becomes the new number 1, so the pattern for the A7 chord is also 1-3-5-6-8-6-5-3.

Rather than figure out the numbers for the entire line in the key of E, each new chord represents a separate “key”—not literally, but in terms of playing and understanding the line. This approach can be especially effective in playing blues.

E7

A7

SYNCOPATED EIGHTH NOTES

Syncopation is the placement of rhythmic accents on weak beats or weak portions of beats. Syncopated eighth notes, for example, emphasize the upbeat, or “and” of a beat. They are an important part of rock, blues, funk, R&B, soul, latin, jazz, and even country music.

DOWNBEATS SYNCOPATED

COUNT: 1 + 2 + 3 + 4 + (1) + (2) + (3) + (4) +

Practice these slowly, counting the eighth notes aloud “1 + 2 +” etc. In order for syncopation to sound correct, the downbeats need to be felt. Once you are comfortable with the rhythms, use a metronome clicking on quarter notes.

57

COUNT: 1 2 + (3) + (4) 1 2 + (3) + (4) + 1 (2) + (3) + (4) + 1 + (2) + (3) + 4

58

COUNT: 1 (2) + (3) + (4) + 1 + (2) + (3) + 4 (1) + (2) + 3 4 1 + (2) + (3 + 4 +)

59

COUNT: 1 (2) + (3) + (4) +

60

COUNT: 1 (2) (3) + (4) (1) + (2) (3) (4) +

61

Fingerstyle players, remember to alternate between index (i) and middle (m) fingers. To mute the string during a rest, place the alternate finger down early—stopping the string’s vibration—before playing the next note. Pick style players, continue to use downstrokes on downbeats, and upstrokes on upbeats (or play all downstrokes, if you prefer). Be sure to mute all rests with your left hand.

THE MAJOR TRIAD

A *major triad* is a three-note chord structure built with the root, 3rd, and 5th notes of the major scale.

C MAJOR SCALE

On instruments like guitar and piano, chords are typically played with all notes ringing at the same time. On bass, they are played in a melodic sequence, called an *arpeggio*. Arpeggios are used in bass lines to outline the chords of a song.

C MAJOR ARPEGGIO

Major triads can be played in all keys within the universal scale position. The octave is added but isn't considered a new note as it is the same as the root.

C

FNG: 2 1 4 4

T 2 5 5 5 2
A 3 2 5 5 3
B 3 2 5 5 3

But they can also be played this way in any key: Don't try to stretch for the 3rd of the chord; shift up to the 4th finger.

C

FNG: 1 - 4 1 1

T 5 5 5 5 7
A 3 7 5 5 3
B 3 7 5 5 3

In many keys, open strings are also available.

C

FNG: 2 1 0 4

T 0 5 5 0 2
A 3 2 0 5 3
B 3 2 0 5 3

When deciding which fingering to use, consider which is most convenient to play, but also consider which sounds better.

Here are the *flat key* major triads with various fingerings. Practice them each way several times, say the note names, and the scale numbers. Once familiar, use a metronome clicking quarter notes.

TRACK 32

TRI AGAIN

65

A

E A

B E *To Coda* ⊕

B

A D E

G C A B *D.C. al Coda*

⊕ *Coda*

E

Remember how D.C. al Coda and Coda signs work? In the piece above, take the repeat sign back to letter A; next time, go on to letter B. When you reach the D.C. al Coda indication, go back to the top of the song and play until the To Coda (⊕) indication. From there, skip to the Coda at the end of the song.

This example takes the basic triad and adds an additional note, the **6th**, for a slightly different type of line.

TRACK 33

FUNKY LI'L BLUES

66

F7

B^b7 F7

C7 B^b7 F7 C7 F7

THE MINOR SCALE

The **minor scale** has a flatted 3rd scale degree, which gives it a “sadder” quality compared to major. While there are several types of minor scale, we’ll learn what’s called “natural minor.” In addition to the flatted 3rd, it also has flatted 6th and 7th degrees.

C NATURAL MINOR

The natural minor scale also has a universal fingering that will work in any key. It uses the OFPF system and starts on the 1st finger.

67

FNG: 1 3 4 1 3 4 1 3

T
A
B

3 5 6 3 5 6 5 3

Practice the natural minor scale first saying the note names, then saying the scale numbers. Also practice it using this scale sequence.

TRACK 34

MINOR SCALE SEQUENCE

68

Scale # 1 $b3$ 2 4 $b3$ 5 4 $b6$ 5 $b7$ $b6$ 8 $b7$ 5 8

8 $b6$ $b7$ 5 $b6$ 4 5 $b3$ 4 2 $b3$ 1 2 5 1

RELATIVE MINOR AND MAJOR

The natural minor scale and the major scale are related to one another. Play the C major scale; the 6th note is A. Now play A natural minor. It contains the same exact notes as C major. This is because A minor is the **relative minor** of C major. They share the same key signature.

A NATURAL MINOR

C MAJOR

To find the relative minor of any major key, count down to the 6th scale degree of that major scale. In reverse, to find the relative major of any minor key, count up to the flat 3rd of that minor scale.

*Understanding how the relative major/minor concept works, you now see that the proper key signature for C minor is actually the same as the key signature for E^b major: that is, three flats.

To get familiar with the natural minor keys, let's play them first in open position—where possible—and then in the universal natural minor fingering: 1-3-4, 1-3-4, 1-3. Say the note names as you play, and then the scale numbers.

First, here is A minor. Start on the open A string for open position; on the 5th fret, E string for universal fingering.

A MINOR

Now try the *flat key* natural minor scales.

Start on open D for open position; on the 5th fret, A string for universal.

D MINOR

Start on 3rd fret, E string for open position or universal.

G MINOR

Start on 3rd fret, A string for open position or universal.

C MINOR

Start on 1st fret, E string for universal. Also try one octave higher, at the 8th fret, A string.

F MINOR

Start on 1st fret, A string or 6th fret, E string.

Bb MINOR

Here are the *sharp key* natural minor scales.
Start on open E for open position; at the 7th fret, A string for universal (one octave higher).

E MINOR

Start on 2nd fret, A string for open position or universal. Start on 7th fret, E string for universal.

B MINOR

Start on 2nd fret, E string.

F# MINOR

Start on 4th fret, A string.

C# MINOR

Start on 4th fret, E string.

G# MINOR

For more practice with the minor scales, be sure to play them using the Minor Scale Sequence (on page 32). Here are diagrams of the universal fingering for the minor scale (as well as a lower extension) for your reference:

Identify the keys below. Play the corresponding minor scale, in open or in universal position, saying the note names aloud. Then play the piece.

EIGHTH-NOTE TRIPLETS

Triplets manage to squeeze three notes into the space of one. For example, instead of dividing the quarter note in half as in regular eighth notes, it is split into thirds—resulting in eighth-note triplets.

8TH NOTES TRIPLETS

1 + 2 + 3 + 4 + tri - pl - et tri - pl - et tri - pl - et tri - pl - et

Evenly space the word “tri-pl-et” starting on each quarter note; make sure they feel relaxed and “round.” In pick style playing, triplets can represent a real challenge. Be sure to keep downstrokes on downbeats (1, 2, 3, and 4). This means either playing all downstrokes, or using a downstroke-upstroke-downstroke combination.

78

COUNT: 1 tri - pl - et 3 tri - pl - et tri - pl - et tri - pl - et 3 4 1 2 tri - pl - et 4 1 tri - pl - et tri - pl - et 4

79

COUNT: tri - pl - et tri - pl - et tri - pl - et 4 tri - pl - et 2 (3) tri - pl - et 1 + 2 + tri - pl - et 4 1 tri - pl - et 3 tri - pl - et

Triplets can also be written with a connecting bracket—for example, if there is a rest within the triplet. When an eighth-note rest is placed within the triplet bracket, it becomes an eighth-note triplet rest. The missing syllable is a place marker.

80

COUNT: tri - pl - et tri - pl - et (tri) - pl - et 4 tr - pl - et (tri) - pl - et 3 4 (tri) - pl - et (tri) - pl - et tri - pl - et 4

81

COUNT: 1 (tri - pl) - et 3 (tri - pl) - et 1 2 tri - pl - et (tri - pl) - et 1 (tri - pl) - et tri - pl - et (tri) - pl - et 1 2 tri - pl - et (tri - pl) - et

This bass line has a 12/8 feel. Notice how the drum part breaks up the beat with triplets on the hi-hat.

TRACK 44

THE '50S

82

Musical notation for 'THE '50S' in 12/8 time. The bass line consists of three staves. The first staff starts with a C chord and a triplet of eighth notes. The second staff includes chords C, Am, Dm, G7, and Fm, with a 'To Coda' section. The third staff includes chords C, A7, D, G, and ends with 'D.C. al Coda'. A separate Coda section is shown at the bottom.

COUNT: 1 tri - pl - et 3 tri - pl - et 3

12/8 TIME

Sometimes, triplet-based music is notated in **12/8 time**. In 12/8, there are twelve eighth notes in each measure. However, the dotted quarter note () gets the emphasis—so the feel is still essentially four beats per measure, with each beat divided into three eighth notes.

Musical notation illustrating 12/8 time with a bass line. The notation shows a dotted quarter note followed by eighth notes, with a count from 1 to 12 below the staff.

COUNT: 1 - 2 - 3 4 5 6 7 - 8 - 9 10 11 12

This movable box shape line takes advantage of the open D string to facilitate the position shift.

TRACK 45
SLOW/FAST

BUMPIN'

83

Musical notation for 'BUMPIN'' in 12/8 time. The notation includes a bass line with a key signature of one sharp (F#) and a fretboard diagram below it. The fretboard diagram shows fingerings for the bass line across four measures.

Bm D E Bm

THE SHUFFLE RHYTHM

A popular rhythm based on eighth-note triplets is the **shuffle**. It is the foundation of most blues, as well as being used in many other styles. The shuffle uses the 1st and 3rd beats of an eighth-note triplet to create a familiar “stuttering” feel.

TRIPLETS SHUFFLE

tri - pl - et tri - pl - et tri - pl - et tri - pl - et tri - (pl) - et tri - (pl) - et tri - (pl) - et tri - (pl) - et

The shuffle can also be written and played with a longer, smoother feel. In this case, the first two beats of the eighth-note triplet are joined, adding up to a quarter note. Because triplets can be cumbersome to read, this feel is also sometimes notated simply as eighth notes, but with a shuffle indication ($\text{♪} = \text{♪}^3 \text{♪}$) at the start of the piece.

LONG/SMOOTH

tripl - et tripl - et tripl - et tripl - et

Here are some classic shuffle feels. This first one is of the “long/smooth” type.

THE CHROMATIC WALKUP

TUNING NOTES

TRACK 1

The **walkup** is a classic pattern used in rock, R&B, gospel, funk, blues, and many other styles. It starts on the root of a chord and uses a chromatic (half-step) motion to return to the root.

The simplest version of this is a one-measure pattern that drops from the root to the 6th and then moves back up.

D7

FNG: 4 1 2 3

The walkup can also drop down to the 3rd of the lower octave for a longer buildup.

D7

FNG: 4 1 2 3 4 1 2 3

The following walkup moves up to the octave. To get back to the starting note, it drops to the 3rd and goes up to the 5th. It jumps down a 7th in the middle of the pattern to finish back at the root. Notice where the shift happens.

TRACK 2

D7

FNG: 2 1 2 3 4 1 2 3 4 1 2 3 4 1 2 3

T 4 5 6 7 4 5 6 7 4 5 6 7 2 3 4

A 5 4 5 6 7 4 5 6 7 4 5 6 7 2 3 4

B 5 4 5 6 7 4 5 6 7 4 5 6 7 2 3 4

TIP: The pattern above is based on a universal fingering (one-finger-per-fret), so it's movable to any root, chord, or key. Try it on another root on the E or A string. (The shorter versions shown above are also movable.)

This extended version of the walkup alternates between low and high movement. It's a great way to keep the bass line interesting over a long section of one chord. Notice the shifts.

TRACK 3

STACCATO

Playing your notes short is called **staccato**. The little spaces in between each note gives the bass line a “pump-ing” feel. Staccato is indicated by a small dot (•) above the note.

Here’s how it’s done: Play the first note with either the index (i) or middle (m) finger. Before playing the next note, place the alternate finger on the string and stop its vibration. Then play the next note. Practice this slowly first, then gradually increase the tempo.

If playing pick style, use your left hand to stop the string’s vibration.

This classic variation on the chromatic walkup is known as the “double stroke.” Make each note even and consistent. It’s written staccato, but also experiment with different note lengths. Start on the 4th finger using the 1-2-4 fingering system, but switch to one-finger-per-fret (OFPF) in measure 3. When you repeat, use the 1st finger to play the low C.

SIXTEENTH NOTES

Sixteenth notes break each quarter note into four equal subdivisions. They are counted, “1-ee-and-uh, 2-ee-and-uh,” etc. In groups, sixteenth notes are written with a double beam connecting them. Separately, they have a double “flag.” 

10

COUNT: 1 e + a 2 e + a 3 e + a 4 e + a

Practice sixteenths slowly, aiming for consistent volume and tone. Once you are comfortable, use a metronome clicking quarter notes to gauge your rhythmic accuracy.

Fingerstyle, keep alternating between index (i) and middle (m) fingers. Pick style, observe the downstroke (▣) and upstroke (V) indications shown.

11

COUNT: 1 2 3 + 4 e + a 1 2 e + a 3 4 e + a 1 2 3 e + a 4 1 + 2 e + a 3 4

12

COUNT: 1 e + a 2 + 3 4 + 1 e + a 2 e + a 3 + 4 1 (2) 3 4 + 1 e + a 2 e + a 3 (4)

The quarter note can be broken up many ways using sixteenths. When an eighth and two sixteenths are combined, it is helpful at first to count the silent sixteenth (“ee”) during the eighth note.

13

COUNT: 1 2 + 3(e)+ a 4 + 1(e)+ a 2(e)+ a 3 4(e)+ a 1 2 + 3(e)+ a 4(e)+ a 1 (e)+ a 2 (e)+ a 3 4

The same is true for two sixteenths and an eighth.

14

COUNT: 1 2 e +(a) 3 4 1 e +(a) 2 3 e +(a) 4 1 + 2 e +(a) 3 4 + 1 + 2 e +(a) 3 e +(a) 4

SIXTEENTH RESTS

Sixteenth rests take up the same space as sixteenth notes. They look similar to eighth rests, but they have a double flag (instead of a single) to match the double flag of a sixteenth note.

COUNT: 1 e + a (2) e + a 3 (e) + a 4 e (+) a

To play sixteenth rests, you'll need to stop the string from vibrating. Use the same technique you used to play staccato: first play a note with either the index (i) or middle (m) finger; then place the alternate finger on the string and stop the vibration. If playing pickstyle, use your left hand to mute the string (observe the picking indications shown).

COUNT: 1 (2) e + a 3 (4) e + a 1 2 (e) + a 3 4 (e) + a 1 2 e + (a) 3 4 e + (a) (1) e + a 2 3 (e) + 4

COUNT: 1 e (+) a 2 3 e (+) a 4 1 + 2 e (+) a (3) e + a 4 (1) e + a 2 + 3 (e) + a 4 1 2 3 e + (a) 4

Now count for yourself; do it slowly.

Here is an example that combines sixteenth-note rhythms and rests with the C major scale.

Notice the sixteenth-note **anticipation** in the last measure; the E is played slightly ahead of the beat.

TRACK 12

LAYIN' BACK

23

FUNKY SIXTEENTH-NOTE SYNCOPATION

Syncopated sixteenth notes are the essence of funk, Latin, and rock music. Though they are challenging to look at, the rhythms are very familiar to the ear. The key is learning to recognize the sound that matches the picture.

This rhythm uses a **dotted eighth note** and a sixteenth. Remember that a *dot* equals one half of whatever value it is placed after. So a dotted eighth note equals the value of one eighth plus a sixteenth (or three sixteenths).

An easy way to remember this rhythm is to give it a name that sounds like it. Call it “oo-(ka-chu)-bop.”

24

oo (ka chu) bop oo (ka chu) bop oo (ka chu) bop oo (ka chu) bop

0 0 0 0 0 4 4 4 0 0 2 2 4 2 4 2 0 0 4 4 4 0 2

This rhythm hits on the downbeat and the “e.” A good name for it is “chick-en.”

1 e (+ a)

chick - en

36

chick-en chick-en chick-en chick-en chick-en chick-en chick-en

COUNT: 1 2 + 3 e(+a) 4 e(+a) 1 e + a 2 e(+a) 3(e+) a 4 e(+a) 1 e(+a) 2 (e+a) 3 + 4 e (+a)

37

COUNT: 1 + 2 e (+ a) (3) e (+) a 4 e (+ a)

A variation of “chick-en” uses a rest on the downbeat, making the “chick” silent.

(1) e (+ a)

(chick) - en

38 (chick)-en (chick)-en (chick)-en (chick)-en

COUNT: 1 (2) e (+a) 3 (4) e (+a) 1 + (2 e +) a 3 (e +) a (4) e (+a) 1 + (2) e (+a) 3 e (+) a 4

It's interesting to combine the "names" for different rhythms. Creating rhythmic "sentences" like this can help you remember tricky rhythms and play them with assurance. When you first look through this example, see how many rhythm "names" you can identify.

SEVENTH CHORDS

Seventh chords are four-note structures that contain the familiar major and minor triads—root, 3rd, and 5th—plus one more note, the 7th. There are several types of seventh chord; we'll look at the three most common.

MAJOR SEVENTH

The major seventh chord is built 1-3-5-7. The chord symbol is written as “maj7,” though some books write it as “M7” or “Δ7”. There is a universal fingering for the major seventh chord that allows you to play it in any key.

Cmaj7

SCALE # 1 3 5 7

Cmaj7

FNG: 2 1 4 3

When you practice these arpeggios, become familiar with the specific note names that “spell” each chord. Try the universal fingering, as well as open fingerings where indicated.

SLIDES

Sliding into a note is a great way to give your bass line personality. It can sound relaxed and loose, or create a dramatic effect. When sliding from one note to another, slightly relax the pressure on the slide finger to avoid making the fret sound too pronounced. Practice sliding with different fingers, at various speeds, and different distances. If a slide has a "slur" marking above it, only the first note is plucked; the second note is simply slid into.

MINOR PENTATONIC

Pentatonic scales are five-note structures that are widely used in all styles of music. The **minor pentatonic** scale is built 1- \flat 3-4-5- \flat 7-8 (the octave is not counted as a separate note; hence the name penta-tonic).

There are two universal fingerings. The first is based on the minor scale position and uses one finger per fret; the second uses the 1-2-4 fingering system and starts on the 4th finger, shifting up between scale degrees 4 and 5.

A MINOR PENTATONIC

SCALE # 1 \flat 3 4 5 \flat 7 8

FNG 1: 1 4 1 3 1 3 3 1 3 1 4 1

FNG 2: 4 1 4 - 4 1 4 4 1 4 1 - 1 4

Here are the most common keys for the minor pentatonic scale. E minor pentatonic is in open position and has a unique fingering; the rest use the universal fingerings shown above. Optional open position fingerings are also indicated in some cases.

HAMMER-ONS & PULL-OFFS

Two adjacent notes on the same string can be played with one pluck of the finger using a **hammer-on** or a **pull-off**. Play a lower note with the 1st finger, and then “hammer on” to the higher note with the 4th finger. Reverse this action by playing a higher note with the 4th finger, and then “pull off” to the 1st. These articulations are indicated with a slur marking.

PLAYING OFF CHORD SYMBOLS

While most of what you've learned so far has been written out for you, the bassist is often called upon to create his or her own part or line based on a series of chord symbols. Fortunately, it is fairly simple to create solid, functional bass lines that outline a chord progression using the information you already have at your disposal.

The first priority of a good bass line is to establish the **root motion**—that is, movement from one chord to the next. By using the rhythmic feel of the song and playing the root of each new chord, you can create a perfectly usable bass line that, while not exotic, is often the best thing to play. You'll usually have several possible locations to choose for each root—avoid making jumps bigger than an octave from one root to another.

TRACK 38

JUST ROOTS

59

F7 B \flat 7 Gm7 C7

R R R R R R R R R R R R R R R R

Here is the same chord progression using a steady eighth-note rhythm.

TRACK 39

ROOTS & 8THS

60

F7 B \flat 7 Gm7 C7

R R R R etc. R R R R etc. R R R R etc. R R R R etc.

The **octave** is still the root of the chord, but it gives the line a feeling of movement. You can start on the lower root and use the higher octave, or you can reverse this and start on the higher octave and use the low root for movement.

TRACK 40

JUMPING OCTAVES

61

F7 B \flat 7 Gm7 C7

R R R R R 8 R R R R R 8 R R 8 R R R R R R R 8 R R R R R 8 R 8

TIP: When playing octaves fingerstyle, it's often easiest to use a "split fingering": middle finger (m) on the higher string and index (i) on the lower. When alternating fingers on a single string with occasional octave jumps, use your middle finger to jump up to the octave, and your index finger to jump down.

Play your own bass line to this chord progression. Using the suggested rhythm, play roots and octaves.

TRACK 41

YOUR TURN

62

Em7 A7 D Bm7

G A7 D G A

ADDING THE 5TH

The next note to add to a bass line is the **5th** of the chord. An easy way to find the 5th is to go up 2 frets and over one string. But you can also find the 5th *below* the root: it's located at the same fret, one string lower (using the finger roll). For example, C's 5th is G; you can find it above or below the root.

C

R 5 R 5

Either high or low 5th will work when creating bass parts; it's up to you to decide which sounds best.

Notice how smooth transitions from one chord to the next can create direction in a line. In this progression, starting on the higher F gives you the option of playing the low 5th, which flows easily into the lower B \flat ; the high 5th of B \flat moves nicely into the higher G, and so on. It's important to keep this type of close movement in mind when creating your own bass part.

TRACK 42

USE THE 5

63

F7 B \flat 7 Gm7 C7

R 5 R 5 R 5 R 5

F7 B \flat 7 Gm7 C7

R 5 R 5 R 5 R 5

Create your own part using the steady eighth-note rhythm. You can play it through once using the lower root choices, and the next time with the higher ones.

TRACK 43

5 BY 8

64

Exercise 64 is a bass line in 4/4 time, consisting of 16 measures. The key signature has one flat (Bb). The line is divided into four measures, each with a specific chord: F7, Bb7, Gm7, and C7. The notation uses eighth notes and rests, with fingerings indicated by numbers 1-5. The first measure (F7) has a pattern of eighth notes: F2 (1), G2 (2), A2 (3), Bb2 (4), C3 (5), D3 (1), E3 (2), F3 (3), G3 (4), A3 (5), Bb3 (1), C4 (2), D4 (3), E4 (4), F4 (5). The second measure (Bb7) has a pattern of eighth notes: Bb2 (1), C3 (2), D3 (3), Eb3 (4), F3 (5), G3 (1), Ab3 (2), Bb3 (3), C4 (4), D4 (5), Eb4 (1), F4 (2), G4 (3), Ab4 (4), Bb4 (5). The third measure (Gm7) has a pattern of eighth notes: G2 (1), Ab2 (2), Bb2 (3), C3 (4), D3 (5), Eb3 (1), F3 (2), G3 (3), Ab3 (4), Bb3 (5), C4 (1), D4 (2), Eb4 (3), F4 (4), G4 (5). The fourth measure (C7) has a pattern of eighth notes: C3 (1), D3 (2), Eb3 (3), F3 (4), G3 (5), Ab3 (1), Bb3 (2), C4 (3), D4 (4), Eb4 (5), F4 (1), G4 (2), Ab4 (3), Bb4 (4), C5 (5). The line ends with a repeat sign.

Roots, 5ths, and octaves outline the basic structure of any chord; they are safe choices that work with any chord type. This time, use the root, 5th, and octave together to create a line. Remember that you can start on a low root and move up to the octave, or you can start on a high root and move down to a low octave.

TRACK 44

ROOT-5-8

65

Diagram of the bass line for measure 65. The staff is in 4/4 time with a key signature of one flat (Bb). The measure is divided into four equal parts, each with a chord symbol above it: F7, Bb7, Gm7, and C7. The notes are as follows: F7 (F2, A2, C3), Bb7 (Bb2, D3, F3), Gm7 (G2, Bb2, D3), and C7 (C3, E3, G3). The notes are beamed in pairs: (F2, A2), (C3, Bb2), (Bb2, D3), (F3, G2), (G2, Bb2), (D3, C3), (C3, E3), and (G3, F3). The notes are beamed in pairs: (F2, A2), (C3, Bb2), (Bb2, D3), (F3, G2), (G2, Bb2), (D3, C3), (C3, E3), and (G3, F3). The notes are beamed in pairs: (F2, A2), (C3, Bb2), (Bb2, D3), (F3, G2), (G2, Bb2), (D3, C3), (C3, E3), and (G3, F3). The notes are beamed in pairs: (F2, A2), (C3, Bb2), (Bb2, D3), (F3, G2), (G2, Bb2), (D3, C3), (C3, E3), and (G3, F3).

F7 Bb7 Gm7 C7

R R 5 8 8 R 5 8 5 R R R 5 8 8 R R 5 8 R

Create your own bass line to this progression using roots, 5ths, and octaves. Use the indicated rhythm, and alternate the line from octave to root on one chord, root to octave on the next. Then see what variations you can find.

TRACK 45

YOU GOT IT

66

F A7 B \flat G7

8 5 R R 5 8

C7 A7 Dm7 B \flat C

CHROMATIC APPROACH

The root, 5th, and octave are **target notes**; you aim for the root on the downbeat of a new chord, while the 5th and octave are two notes that allow for movement during the measure without interfering with the chord type. To create even more movement in the bass line, we add **approach notes**—notes that *lead into* a target note.

Chromatic approach notes lead into the target note by a half step (one fret). They can approach the target from above or below. Notice how this bass line uses a chromatic approach (chr) to lead into the root of each new chord. In measures 3 and 4, a “chr” is also used to lead into the 5th, adding more movement to the line.

C E7 Am7 D7

R 5 R chr R 5 R chr R chr 5 R chr R chr 5 R chr

When choosing your chromatic approach notes, remember to try them from above *and* below the target note.

TRACK 46

67 F7 Bb7 Gm7 C7

R chr R chr R chr R chr

TRACK 47

CHROMATIC R-5-8

68 F7 Bb7 Gm7 C7

R chr 5 5 8 R 5 8 5 chr 8 5 R R chr 5 chr

Now use chromatic approach on your own. Start by simply playing the root and a “chr” to the next chord. When you’re comfortable with the progression, add the 5th of each chord. Then use “chr” to lead into those 5ths. Any of the rhythms from previous examples will work; start simply, and then experiment.

TRACK 48

IT'S UP TO YOU

69 G C Am7 D7

G C Bm7 E7 Am7 D7

SCALE APPROACH

Scale approach uses the adjacent scale tone (from above or below) to approach the target note. Use the scale of the *new* target chord. Most of the time, scale approach is a whole step (2 frets). There are, however, instances where the scale tone may be a half step away from the target—for example, when approaching a major chord from below. It doesn't matter whether you call it scale or chromatic approach; just use it.

D Bm7 G A7

R R R sc R 5 R sc R sc 5 R sc R sc 5 R sc

TIP: When approaching a dominant seventh chord (e.g., A7) from below, use a $\flat 7$ scale degree to match the chord.

TRACK 49

F7 B \flat 7 Gm7 C7

R sc R sc R sc R sc

This uses “sc” to the 5th on the B \flat 7 and C7. Once you are comfortable with this version, look for other ways to use “sc” with this progression.

TRACK 50

SCALE R-5-8

F7 B \flat 7 Gm7 C7

R 5 8 sc R sc 5 R sc R R R sc R sc 5 5 sc

Applying any rhythm previously played, use scale approach to move from one chord to the next. Then try adding the 5th and approaching it when you choose. (Tip: For minor chords, remember to use a $\flat 6$ when approaching the 5th.)

TRACK 51

ALL YOURS

F#m A F#m B7

F#m E D E

DOMINANT APPROACH

Dominant approach uses the 5th of the target note. Many chord progressions are built with dominant root motion, which is when the root motion resolves to a new chord from its 5th. In those cases, using a dominant approach simply outlines the existing root motion. Using “dom” between chords that do *not* have a dominant root motion creates a very strong movement.

72

A D Bm7 G

R 5 5 dom R 5 R dom R dom 5 8 dom 8 5 R dom

TRACK 52

73

F Dm7 Bb C

R dom R dom R dom R dom

It's tricky at first to grasp using the “dom” of the 5th. This line illustrates the concept effectively. (Hint: It's basically scale degree 2 of the chord.)

TRACK 53

DOMINANT TO THE 5TH

74

F Dm7 Bb C

R dom 5 dom R R R dom R dom 5 dom R dom 5 dom

Now use dominant approach on your own. You can add the “dom” that leads into the 5th anytime you want. When the root motion is already dominant, just use the root.

TRACK 54

YOU GO, HUGO

75

Bb maj7 Cm7 Dm7 G7

Cm7 Eb maj7 Dm7 C7 Cm7 F7

USING TRIADS TO CREATE BASS LINES

Triads can be used to build bass lines that clearly state the chord progression. Used in conjunction with the root-5-8 and various approach notes, you have a very complete set of tools to construct an interesting and functional bass part.

The first step is to recognize which *type* of triad the chord symbol indicates. Here are the five basic chord structures you've learned so far. Major and minor triads are easy to grasp; major seventh and dominant seventh chords have major triads as their foundation, while the minor seventh chord contains a minor triad.

Diagram showing five basic chord structures on a bass staff: C, Cm, Cmaj7, C7, and Cm7. The C, Cmaj7, and C7 chords are grouped under a bracket labeled "MAJOR TRIAD". The Cm and Cm7 chords are grouped under a bracket labeled "MINOR TRIAD".

Here is an example of using triads with an approach note to each new chord. Using a quarter-note rhythm, we wind up with a classic walking bass line in a jazz style.

TRACK 55
SLOW/FAST

WALKING TRIADS

76

Cmaj7 Am7 Dm7 G7

R 3 5 chr 8 5 \flat 3 sc R \flat 3 5 chr 8 8 5 dom

Em7 A7 Dm7 G7

R \flat 3 5 dom R \flat 3 5 chr R \flat 3 5 sc R 5 3 sc

Now it's your turn to walk through the "changes." Stick to triads only at first. You can vary your line by playing the chord tones in a different order and direction.

TRACK 56

WALK THIS WAY

77

$\text{B}\flat$ maj7 Gm7 Cm7 F7

Dm7 G7 Cm7 F7

It is possible to “bounce around” within the triad—notice that the F triad below changes directions. The second half is open for you to make your own choices; make sure you are familiar with each triad before playing.

TRACK 57

SIMPLE TRIADS

78

B \flat E \flat F Gm

R 3 5 R 3 5 R 3 5 R 8 5 \flat 3 R

Cm F E \flat B \flat

R 3 5 R 3 5 R 3 5 8 5 3 R

Once you’re comfortable with a chord progression, try adding approach notes on beat 4. Remember: you have three ways of approaching a target note: by half step (1 fret), whole step (2 frets), or by 5th. Play the triad for the first three beats of each measure, but focus your attention on the upcoming chord, and play around with different approaches to its root.

TRACK 58

ON YOUR OWN

79

B \flat maj7 Gm7 Cm7 F7

Dm7 G7 Cm7 F7

Here’s the same chord progression as example 76, played with a dotted quarter/eighth note rhythm. Notice the different ways the triad gets placed in the measure. Also notice the approach notes—nearly all of them are also chord tones! (Can you spot the one that isn’t?)

TRACK 59

LOCKING IN TO THE GROOVE

A **groove** is any particular rhythmic idea that forms the basis of a song. When bass and drums play together, they need to connect their parts so that it feels like one unified beat. The term “locking in to the groove” is used to describe this phenomenon. To lock in, the bassist and drummer must listen to each other’s part and find a shared sense of where the groove is, so they can play together. One way that bassists and drummers connect is by matching the bass line with the kick drum. Examples A and B are two common rhythms you’ve worked with. Examine the matching drum part, and see how the bass line “hooks up” with the beat.

A)

B)

BASS

DRUMS

DRUM SYMBOL KEY

KICK

SNARE

HI-HAT

Here are six different rhythms, or grooves. Learn each, then apply it to the chord—in this case, C7. Start by playing only the root; once you've locked in with the groove, see what other notes you can play. Although there are many note choices available, you're not obligated to play them all. However, as a bassist, you are obligated to maintain the groove.

TRACK 61

GROOVE JAM

a)

C7

play 4 times

b)

c)

d)

82

The grooves for the A and B sections are indicated. Use them as the basis for your line. Start with simple ideas that match the rhythm. As you listen more closely, you'll find it is possible to vary your line within the basic feel and still keep the groove intact. Experiment with different note choices; use root-5-8, chord tones, and different approach notes.

TRACK 62

SLAP FUNK

The slap funk style started in the late 1960s and is still one of the most popular techniques that bassists use. The two essential elements of the technique are **slapping** the strings (with the thumb) and **popping** them (with the index and middle fingers).

THE SLAP

Keep the thumb parallel with the string—using the bony knob of your thumb knuckle for the striking surface, hit the string at the end of the fingerboard. Use a twist-like motion in the wrist, and pivot the forearm from the elbow to “whip” the thumb on and off the string. Make sure the thumb “recoils” off the string, allowing it to ring.

TIP: Round wound strings are best for slap funk. Medium to low string height allows the bass to respond to the thumb slap. You don’t want to hit the string too hard; it’s wasted energy, and it chokes the sound of the note.

Keep the right arm and shoulder loose and relaxed; tension in these areas greatly decreases how funky you can get!

Start by slapping the open strings. Strive for consistent volume and tone for each note, and from string to string. Mute the open strings with the left hand—laying your fingers flat across the strings—in between slaps, but give the note its full value. The slap will be notated using the letter “T” for thumb.

TRACK 63

84

85

86

87

T T T T T T T T T T T T T T T T

0 3 5/7 5 7

5 7 5 7/9 7 9

9 7 9 7/5 7

7 5 7/5 3 0

THE POP

The pop is achieved by pulling the string with the index or middle finger away from the neck, letting it snap back onto the frets. Make a loose fist with your right hand. Let the thumb come to rest against the E string, parallel as if you were going to slap it. Let your index finger naturally fall in between the D and G string, and the middle finger curl under the G. Pull from the side of the finger. Don't get "caught up" in the string; use just enough to pull the string lightly. Too much pull makes the pop louder than needed, and can cause broken strings.

Although it is possible to slap or pop any string, for the most part, you will be slapping the E and A strings and popping the D and G. It works best to dedicate the index (1st) finger to popping the D string and the middle (2nd) finger to the G.

TRACK 66

91

The octave is a very common part of slap funk. Practice playing these octaves with alternating slap and pop.

95

T P1 T P1 T P2 T P2 T P1 T P1 T P2 T P2

When play the octave C's, try letting the tip of your index finger mute the low E string.

TRACK 68
SLOW/FAST

OCTAVE SLAP

96

T P1 T T P1 T T P1 T T P2 T T P2 T T P2 T T P2

This exercise moves the slap/pop octave around the fingerboard. As usual, play the octave with the 1st and 4th fingers (left hand), but when you play the open E and A strings, use the 2nd finger for their octaves.

TRACK 69

5 5 3 3 0 1 1 0 1 1 1 1 0

THE PRESSURE ROLL

The hammer-on is a technique you already know that's used often in slap funk. Sometimes, it's necessary to set up a hammer-on with the use of a **pressure roll** across the strings. Play a low G with the tip of the 1st finger as usual. Now *roll* the pressure used to push the string down, across to the D string, without dropping the tip of the finger; you'll play the F on the 3rd fret, D string with the bottom part of the 1st finger. This pressure roll allows you to smoothly jump across the strings between slap and pop.

Playing with tip

Pressure roll

ROLL ROLL ROLL ROLL

T P1 T P1 T P2 T T P2 T P1 T T P1 T P2 T T P2

Now use the pressure roll to set up the hammer-ons (indicated with a slur) from the 1st finger to the 4th.

DEAD NOTES

Dead notes are an important part of the slap funk style. By not pushing the string all the way down to the fretboard (in the left hand), you produce a note that is not a true pitch. Slapping or popping these notes creates a unique percussive effect that blends in well.

102

The A section requires you to create your own bass line from the chord symbols and rhythm, while the B section has a specific slap funk line to play. It may take some practice to get comfortable switching from fingerstyle to slap; make sure you stay aware of the switch-over point in the song. The last two measures of the coda are played fingerstyle.

HAL LEONARD BASS METHOD

SECOND EDITION

by Ed Friedland

The Hal Leonard Bass Method is designed for anyone just learning to play electric bass. It is based on years of teaching bass students of all ages, and it also reflects some of the best bass teaching ideas from around the world!

This second edition features all new engravings and excellent new audio tracks. The books have been updated to meet the needs of today's bass students by renowned bassist and author Ed Friedland.

Ed Friedland is a contributing editor and monthly columnist for *Bass Player* magazine. He has taught at Berklee College of Music, Boston College, and Arizona State University, and is a frequent guest clinician around the country. He has written several best-selling titles for the Hal Leonard Bass Builders series, as well as creating the *Slap Bass* DVD. Equally adept on electric and upright bass, Ed has performed with some of the top names in jazz, blues, and R&B, as well as playing studio dates, theatre, and show-biz gigs. His performance credits include: Larry Coryell, Michal Urbaniak, Robben Ford, Wycliffe Gordon, Stacey Kent, Teirney Sutton, Ann Hampton Calloway, Bud Shank, Paul Horn, Johnny Adams, Robert Junior Lockwood, Linda Hopkins, Martha & The Vandellas, the Drifters, the Patters, the Marvellettes, Steve Allen, the Tucson Symphony Orchestra, the Opera Company of Boston, *Little Shop of Horrors*, *Mama Mia*, *42nd Street*, and others!

BOOK 1

Book 1 teaches: tuning; playing position; musical symbols; notes within the first five frets; common bass lines, patterns and rhythms; rhythms through eighth notes; playing tips and techniques; more than 100 great songs, riffs, and examples; and more! The CD includes 44 full-band tracks for demonstration or play-along.

00695067 Book Only.....\$5.95
00695068 Book/CD Pack.....\$9.95

BOOK 2

Book 2 continues where Book 1 left off and teaches: the box shape, moveable boxes, notes in fifth position, major and minor scales, the classic blues line, the shuffle rhythm, tablature, and more!

00695069 Book Only.....\$5.95
00695070 Book/CD Pack.....\$9.95

BOOK 3

With the third book, progressing students will learn more great songs, riffs and examples; sixteenth notes; playing off chord symbols; slap and pop techniques; hammer ons and pull offs; playing different styles and grooves; and more.

00695071 Book Only.....\$5.95
00695072 Book/CD Pack.....\$9.95

COMPOSITE

Special bound edition containing Books 1, 2 and 3. The book/CD version includes three CDs.

00695073 Book Only.....\$14.95
00695074 Book/CD Pack.....\$24.95

BASS SCALE FINDER

EASY-TO-USE GUIDE TO OVER 1300 SCALES

Learn to use the entire fretboard with the *Bass Scale Finder*. This book contains over 1300 scale diagrams for the most important 17 scale types, including major and minor scales, pentatonics, the seven major modes, diminished, melodic minor, harmonic minor, and more, in all 12 keys. Basic scale theory is also presented to help you apply these colorful sounds in your own music.

00695781 6" x 9".....\$4.95
00695778 9" x 12".....\$5.95

BASS ARPEGGIO FINDER

This extensive reference guide lays out over 1,300 arpeggio shapes. 28 different qualities are covered for each key and each quality is presented in four different shapes. A fingerboard chart of the bass neck is also provided to help with transposing the shapes to new keys.

00695817 6" x 9".....\$4.95
00695816 9" x 12".....\$5.95

THE HAL LEONARD BASS METHOD is designed for anyone just learning to play bass. It is based on years of teaching bass students of all ages, and it also reflects some of the best bass teaching ideas from around the world.

This complete edition contains books 1, 2, and 3 bound together in one easy-to-use volume.

BOOK 1 INCLUDES:

- Tuning
- Playing Position
- Musical Symbols
- Notes Within the First Five Frets
- Common Bass Lines, Patterns, and Rhythms
- Rhythms Through Eighth Notes
- Playing Tips and Techniques
- More Than 100 Great Songs, Riffs, and Examples
- CD includes 44 Full-Band Tracks for Demonstration or Play Along

BOOK 2 INCLUDES:

- The Box Shape
- Moveable Boxes
- Notes in Fifth Position
- Major & Minor Scales
- The Classic Blues Line
- The Shuffle Rhythm
- Tablature
- CD includes 51 Full-Band Tracks for Demonstration or Play Along

BOOK 3 INCLUDES:

- More Great Songs, Riffs, and Examples
- Sixteenth Notes
- Playing Off Chord Symbols
- Slap & Pop
- Hammer Ons & Pull Offs
- Playing Different Styles and Grooves
- CD includes 76 Full-Band Tracks for Demonstration or Play Along
